2141 CRESCENT AVE.
St. Louis, Mo.

View of Our Fish Hatchery

Located 12 miles west of St. Louis on a 40-acre tract of land. Our facilities for the propagation of fancy fish and water lilies are second to none. Concrete vats 100 feet long are housed in these buildings for breeding tropical fishes. Over ninety large concrete tanks outdoors are stocked with all kinds of water lilies and plants ready for immediate shipping.

When breeding tropical fishes they should not be disturbed. We have found visitors at the hatchery quite a problem to disturb breeding fish and do not allow visitors on the hatchery grounds.

To My Customers

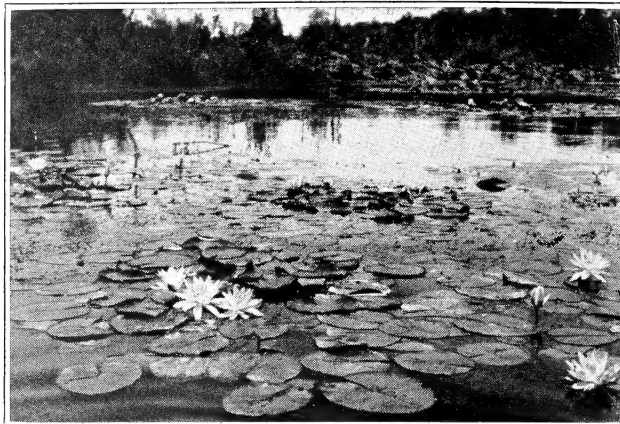

I have been running this business now for over 25 years. It started in a small way like most successful businesses, until we now occupy floor space exceeding 30,000 square feet—not figuring our outdoor ponds, which number over 100. It has always been my policy to supervise most all details. I have made many friends and satisfied customers. It has entailed a lifetime of hard work but I enjoyed it. My business is my hobby and yours, and I know when you send an order for your requirements, you want prompt service and dollar value. I shall guarantee you both. With many thanks,

Sincerely yours,
O. C. BELDT.

View of Our Lily Ponds

Hardy water lilies and many other aquatics are propagated on a 52-acre tract about 69 miles west of St. Louis. The photograph shows the "Sunshine Water Lilies" in a natural setting. The Lotus bed can be seen in the background near the shore line.

We have here about 25 acres under water, where we grow nothing but hardy plants and lilies. These ponds are used only as a source of propagating for shipping stock. No office is maintained on the grounds and they are not accessible to visitors.

NOTICE TO ST. LOUIS FANCIERS

WE HAVE NO RETAIL STORE

We accept orders by mail only. In addition to shipping by express or parcel post, to the local trade we offer a pick-up service. If you mail us your order together with remittance and advise us when you wish to pick up your merchandise, we will have it ready for you. Minimum of three days required.

FACILITIES

Our facilities enable us to serve you efficiently. Our large volume of business and our many years of experience permit us to give you the highest quality merchandise at lower prices. Most all shipments are made the same day the order is received, except where orders call for seasonable supplies, such as water lilies, etc. for which we place orders on file for spring shipment as early as January and February. Order early! Do not wait until the late spring to order your lilies as we may be sold out of some of the varieties.

We are centrally located and whether you live in New York City or Denver, Colo., fast express trains will reach the destination within 24 hours. We ship to all parts of the world; distance is no object.

Try an order from Beldt's and be convinced of the superior quality of our merchandise.

MERCHANDISE

Only Beldt offers a complete variety of aquatic supplies. We offer a complete line of fish aquariums, remedies, fishfoods and heaters. Many features in our catalog are exclusive, such as the especially constructed heavy duty wrought iron and angle iron roller stands with heavy casters for large aquariums, so that these aquariums may be moved away from the window should the necessity arise.

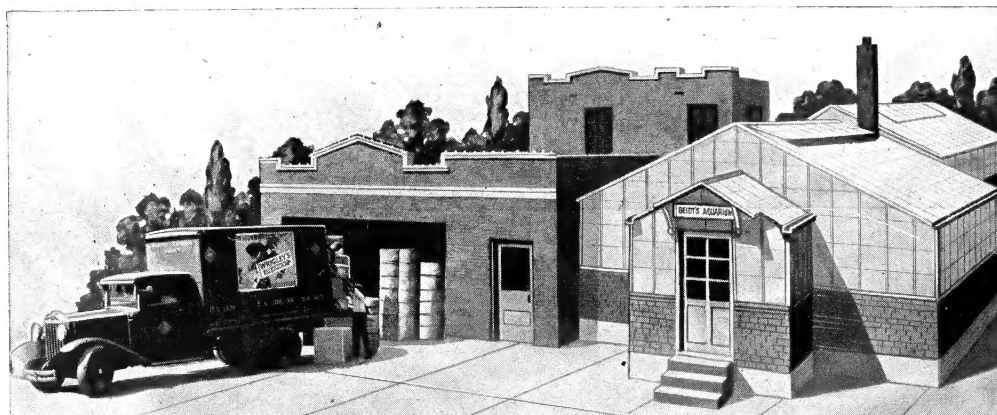

For the pool we also have a very complete line of fancy goldfish, including the rare Lionheads, Orandas and Golden Orf.

You will find our aquarium plants of the highest quality, all greenhouse grown. We guarantee to send you healthy and vigorous water lilies, all true to name, at the proper planting time for your locality. No matter what you want, if you do not find it listed in our catalog, write us.

Customer's testimonials are unsolicited and may be viewed at any time.

USE ORDER BLANK ON REVERSE SIDE WHEN ORDERING

THE SUCCESSFUL WATER GARDEN

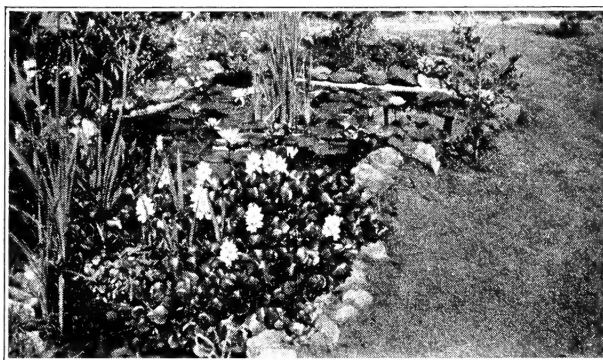

The success with water gardens depends on quite a number of features. One of the most important of these features is sufficient sunlight and equally important is the depth of the pond. A number of subjects may be taken into consideration when you determine the depth of your pool. If you only consider the planting of water lilies, then your pool will be deep enough if you make it from 18 to 20 inches, but if you want to keep goldfish in your pool and you want to keep them over the winter, you should have a certain water depth of usually about 36 inches, and in some localities even deeper water is required. One can readily understand that everything should be taken into consideration in order to have the type of pool that will take care of your particular requirements.

Location

The location of the pool should be where it receives a lot of sunlight. Plenty of sunshine is absolutely necessary for the growth and success of water lilies and all kinds of aquatic plants. Therefore, build the pool away from

large trees and away from buildings in order that it may receive a maximum amount of sunlight.

A pool 3 feet deep is best. In

Lily pool of Silas W. Rogers, of El Dorado, Arkansas, showing a nice growth of cattails, water hyacinths and other bog plants, also tropical water lilies. An informal pool with a rough rock edge.

considering the depth of your pool you cannot disregard the fact that you may want to leave your goldfish in this pool over winter. In a southern climate 20 inches of depth is all that is required to prevent the goldfish from dying over the winter.

Concrete Mixture

Use three wheelbarrows full of gravel, two wheelbarrows full of sand and one sack of cement. This makes a good concrete mixture for the average pool. For

all be poured at one time. After these forms are removed, pull these small pegs of wood out of the bottom and fill them in with concrete finish when the pool is finished. This in no way will weaken the general structure of the pool. Reinforcement may be used, though the writer has never used much reinforcement in any pool. At our plant near Florissant, St. Louis County, Missouri, we have around 100 concrete tanks varying in size from 6x10 feet to 20x30 feet and the only reinforcement we used in their construction is that we lay one large iron rod about 1/2 inch thick into the center of the wall of the pond about 4 inches below the surface of the ground. The contention is that while water freezes, it exerts its most pressure on the concrete right near

Lily pool of the Baybay Agricultural High School, Philippine Islands. Mr. Fred Warner, principal, writes: "Enclosed are photographs of two of our lily ponds, in which are blooming fifteen kinds of Beldt's water lilies. Of course the pictures give no idea of the color display."

finishing work you should use a wheelbarrow three-quarters full of sifted sand to one sack of cement. All concrete work should be in the neighborhood of six inches thick. Reinforcing of this concrete may be accomplished through the aid of ordinary chicken wire laid in the center of this concrete. The sloping walls of the informal pool have a great tendency to prevent breakage as the pressure exerted when the water freezes during the winter time is not as great as if the walls were straight. Therefore the slanting walls really have two good features; one is that they do not crack as easily during the winter time, and the other that it is much cheaper to build the walls than if you would have to build a form to retain them.

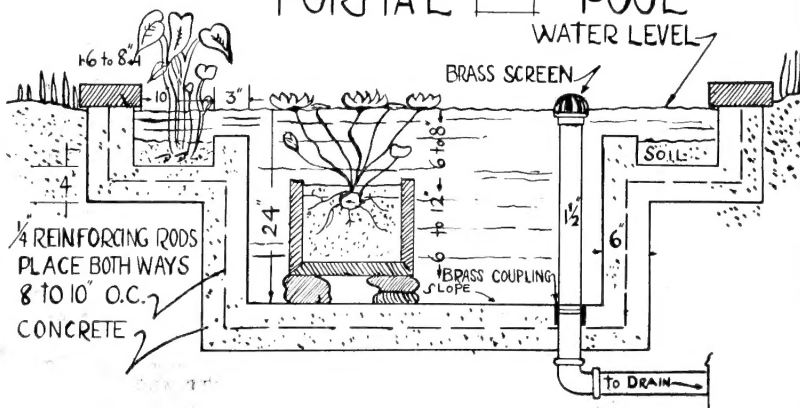

The Formal Pool

Formal pools may be constructed in all various shapes. The formal pool as a rule is built into the center of the garden or near the center. In constructing the form work for a formal pool, it is a good practice to set this form work about six inches from the bottom on small pegs of wood so that the bottom and sides can

Mrs. E. T. Young of Warren, Indiana, enjoying the fragrance of water lilies in her pool.

the ground level, or as far as the pool is filled with water. It does not exert any pressure below the ice.

DETAILS OF CONSTRUCTION
FORMAL POOL

Let Beldt Supply Your Lily Pool Requirements

and be assured that our 25 years of growing and selling water lilies and fancy fish to thousands of customers all over the world guarantees you absolute satisfaction. You will find our prices very reasonable and the water lilies which we ship all true to name and all healthy and vigorous plants. You will find our collection most complete. No other grower can offer you better quality and lower prices.

HOW TO PLANT YOUR WATER LILIES

Hardy Water Lilies

Can be planted at any depth from 12 inches to 48 inches. They will, however, do best at a depth of about 12 inches because the deeper you plant them the more strength is consumed in under water growth; also the flowers are not quite as strong if they

the water surface of the pool so that the tropical lilies are not more than 6 inches below the water surface, or else raise the box by placing several bricks under it. Then after the lily has been growing for a month and is well established in your pool, you may lower this box. For planting tropical water lilies use boxes at

of your lily pool tremendously. The planting of water lilies is really not different than planting most other kinds of plants except that you set them under water. Never plant your water lilies first and then fill the pool. It is best to have the pool filled at least a week in advance so that the water has had a chance to get warm. The newly planted lilies will grow much better in aged water than in fresh water. Plants do best, and you keep your pool much cleaner, if you do all your planting in various boxes instead of covering the entire bottom of your pool with soil. Never use any kind of metal containers.

The Care of Goldfish

While we cannot go into the details of breeding and propagating, etc., as this would be too lengthy a subject, we would like to call your attention to a small booklet, "Goldfish and Their Care," which we have listed in this catalog and which can be sent to you for 15c, postpaid. It describes all the diseases and how to prevent them. It also describes the breeding habits and other details useful to you in learning the successful methods of handling goldfish.

We wish, however, to bring out a few important points which everyone should know who keeps goldfish in a pool. In the average pool of three-foot depth, goldfish may be left out during the winter without any danger of loss except if the pool is crowded. That is, if you have raised a lot of goldfish and the pool is very crowded with them, then you should dispose of your surplus goldfish in the fall of the year and only keep as many goldfish in the pool as you desire to start with next spring. Goldfish become almost lifeless as the water freezes. It must be remembered that they are cold blooded creatures and the colder the water gets, the less they breathe. In fact, after the ice

once forms on your pond, you may quit feeding the fish as they do not consume any food until after the ice has disappeared and the water again becomes warmer.

If you wish to bring the fish indoors into the living room for the winter, or keep them in the cellar, adequate provisions must be made to take care of them. Most people overcrowd these goldfish and lose them. When keeping goldfish in an aquarium or trough over the winter, you should not keep over two inches of fish to the gallon of water. It is best to keep them in a cool place. Of course, you can keep them in a warm living room over winter, but if the temperature is 70 or above, then at the most you should keep only one inch of fish to the gallon of water. If a goldfish is two inches long and has a tail two inches long, then you should have four gallons of water to keep it in.

Fish Can Not Be Put In a New Pool

A newly constructed pool must be seasoned. That is, when the pool is filled with water for the first time the water absorbs the lime contents in the concrete. This is fatal to the fish as their fins get ragged and rotten. It usually ends in Fungus which is a white cotton like growth on their fins, tails, and body.

How To Prevent Fungus In a New Pool

There are two ways to prevent Fungus in a new pool. The old method is changing the water after letting it stand for about a week. Three changes of water usually removes all this lime sufficiently to prevent any further trouble. The other method is the use of waterproof enamels. These waterproof enamels are listed elsewhere in this catalog and may be obtained in various colors. These asphalt enamels should be applied to dry concrete only, as this asphalt will not adhere to damp walls. Therefore, great care must be taken to see that the concrete is absolutely dry. This asphalt enamel can be supplied in the Black color at \$1.50 per gallon or in 5 gallon cans at \$6.00. One gallon of this enamel will cover from 150 to 250 square feet of surface, all depending on how thick you desire to apply it and how smooth the concrete work is. The thicker you put it on, the more effective is the protection it affords. Asphaltum enamel also stops many leaks as it seeps into the porous concrete. Another quality to be considered is that the asphalt enamel coating prevents algae and other slimy mosses from taking root in the concrete. The water stays clearer and does not get green nearly as quick.

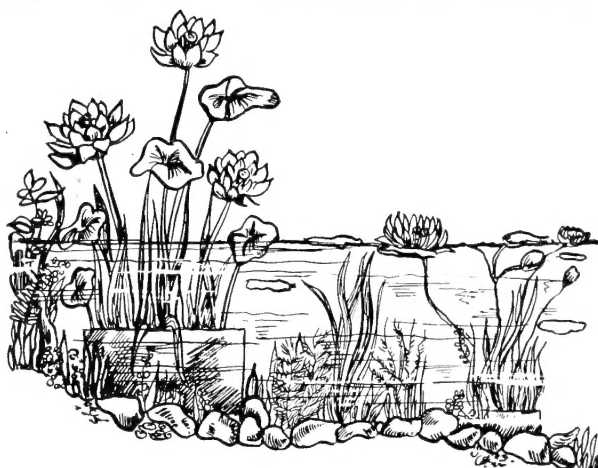

Mrs. Arthur Flesh, of Sea Breeze, N. Y., has included a pool on her home grounds which blends in nicely with the balance of the planting

are planted too deep. Use good, rich soil and for each bushel of soil add one pint of our Magic Water Lily Food, which comes in one pint cartons at 35c each. This will insure a vigorous growth and will build up the soil to last for at least two or three years. It is best to lay the hard water lily root flat about 3 inches below the surface of the soil in the box and do not forget to put about 2 inches of sand on top of the box to keep the water clear.

Tropical Water Lilies

Are shipped after the weather is warm, which in the latitude of St. Louis is about May 20th. Southern shipments are made as early as the later part of March. The important thing in planting tropical water lilies is not to plant them any deeper than they have been growing in the pot. Pack the soil down solid so that the compact root growth in the pot in which the lily has been grown will not settle to the bottom of the lily box. In other words, if you leave the soil loose and plant the lilies, there is danger that the clump of dirt in which you receive this tropical lily will settle down to the bottom of the box. Do not plant the tropical water lily too deep. It is best to lower

least 16 inches square and 12 inches deep. Fill them with good rich soil and use ½ pint of our Magic Water Lily Food to each box. Very good results and wonderful effects may be had by using a 20 inch square box and planting two tropical lilies to one box. This will give you more flowers from one box and you can also plant different colors and improve the general appearance

Planting things on the bottom of the pool in pots or boxes is to be preferred to placing soil directly in the bottom of the pool. It is easy to make small wooden boxes or you may use the regular fern pots which are squat shape flower pots. They do not tip over as easy as the standard size pots.

TROPICAL WATER LILIES... DAY BLOOMER

BLUE COLORS

C. J. Clark

A new, very deep blue hybrid producing flowers 8 inches across, borne on strong stems well above the water's surface. A fine, deep blue. Price.....\$2.50

Henry Shaw

Named in honor of the founder of the Missouri Botanical Gardens. Flowers beautifully blue. Delightfully fragrant. Price each.....\$2.00

William Stone

This is a beautiful and attractive deep blue-purple lily. The flowers are 8 inches across and star shaped. Price each.....\$1.75

*Mrs. Edward Whitaker

The largest flowering day blooming hybrid from Ovalifolia and Castaliifolia. Colors in shades of light blue or dark blue. Price each.....\$1.75

*Dauben

A well-known viviparous day bloomer. The small light blue flowers are produced freely. A good plant for small pools and aquariums. Price each.....\$1.25

*Marmorata

This variety produces perhaps one of the most beautiful leaves of all tender nymphaeas. The leaves are medium green colored with large blotches and squares of brown. The flowers, which are 12 inches across, are blue on the first day they are open and gradually become lighter. (See color illustration on page 7.) Price each.....\$2.00

Colonel Lindbergh

A deep caerulean blue variety producing flowers up to 12 inches across which tower well above the water. The oval shaped leaves are blotched with brown. Price each.....\$2.00

Pennsylvania (Blue Beauty)

Deep blue flowers which get a foot across if plant is given enough root space. The leaves are speckled brown. A good plant for small or large pools. Price.....\$2.00

Violet

This plant produces distinct curly-edged leaves. Flowers up to 8 inches across are produced in abundance. Colors violet-blue. Fragrant. An outstanding recent introduction. Price each.....\$2.00

Wm. T. Innes

A sky blue water lily producing large 10 inch flowers in abundance, the leaves are speckled brown, does extremely well in shady pools as well as in sunny exposures. A hybrid of Zansibar rosea and Mrs. G. H. Pring. Our own creation. (See No. 2, Front Cover.) Price each.....\$2.00

Dr. George T. Moore

Named in honor of the Director of the Missouri Botanical Gardens. A famous Pring hybrid, a very deep purple-blue flower which introduces a new color shade distinctly different from any other purple varieties. Price each.....\$2.50

BLUE COLORS—Con't.

Blue Bird

A full flowering navy blue hybrid. The flowers are 8 inches across and produced in abundance. A very good blue. Price each.....\$2.00

New Dark Blue Whitaker

A great improvement in color over the Mrs. Edward Whitaker, it has all of the fine points of a Whitaker except it is considerably darker blue. Price each.....\$3.00

Judge Hitchcock

A beautiful cup shape violet-blue day bloomer producing flowers 8 inches across. A very attractive water lily which should be in every collection. Price each.....\$2.50

Bagdad

A beautiful blue, large flowering day bloomer. The leaves are very strongly mottled with dark brown blotches; a very great attraction. Price each.....\$4.00

Governor Emerson

A very attractive blue flowering day bloomer of the Marmorata type with mottled leaves. The flowers are carried well above the water. Price each.....\$1.75

Colorata

A new dwarf, very dark purple-blue African lily; produces flowers about 4 inches across. It thrives best and flowers freely if planted in only 6 inches of water. Price each.....\$1.75

NEW YELLOW TROPICAL DAY BLOOMERS

Sunbeam

A new viviparous tropical water lily. One of the deepest yellow tropical water lilies; very free flowering. Price each.....\$5.00

African Gold

A very attractive clear yellow tropical lily—an outstanding yellow so far considered the best. Price each.....\$5.00

St. Louis

A yellow hybrid producing flowers from 10 to 12 inches across. The St. Louis is the only tropical lily which has been patented. A famous Pring hybrid. Price each.....\$3.50

PURPLE SHADES

*August Koch

Produced in the lily pools at Garfield Park, Chicago, by Mr. August Koch. The flowers are purple lilac and the petals a pale violet color, 7 to 8 inches in diameter, open four to six days. Price each.....\$2.00

*Royal Purple

A hybrid produced by A. S. Buskirk. A very deep red purple and a strong grower. Flowers 5-6 inches across. Very fragrant. An outstanding recent introduction. (See No. 8, Front Cover.) Price each.....\$2.50

*Panama-Pacific

A hybrid produced by William Tricker. The predominant color is reddish-purple and the stamens are yellow. Very fragrant and most prolific in blooms. Price each.....\$2.00

Imperial

A hybrid from August Koch and Caerulea producing very fragrant purple flowers about 6 inches across. A strong grower. Good for smaller pools. Free flowering under crowded conditions. Our own hybrid. (See No. 4, Front Cover.) Price each.....\$2.00

SUNSET SHADES

Golden West

Upon opening, the flowers are salmon pink, changing to a light apricot the next day. The light green leaves are spotted with deep maroon shades. A very fragrant day bloomer. Price each.....\$2.00

Talisman

A very attractive introduction. It was named after the Talisman rose as it possesses the same combination of yellow polychromed pink. Price each.....\$3.00

PINK SHADES TO RED

General Pershing

A hybrid from Mrs. Whitaker and Castaliifolia. The pink flowers are delightfully fragrant and open early in the morning. Strong plants. Price each.....\$2.50

Rio Rita

A very brilliant pink, almost red. Base of stamens bright gold. Different shades of pink in sepals, petals and stamens. A riot of colors, creating a brilliant effect. Produced by G. H. Pring. Price each.....\$3.00

Zansibar Rosea

A delightfully pink shaded day blooming lily producing flowers about 6 to 8 inches across, very free flowering. (See No. 5-6, Front Cover.) Price each.....\$1.50

Pink Pearl

A beautiful large cup-shape clear pink. A strong bloomer, very fragrant. Flowers 8 inches across. Price each.....\$2.00

*Mrs. Sawyer (Independence)

A new viviparous day blooming lily, the leaves are shaded with brownish red and the flowers are very deep pink. Very vigorous and free flowering. Price each.....\$1.75

Shirley Marie

A large flowering deep pink of unusual merits. The flowers are 10 to 12 inches across. Very free flowering and attractive. A strong grower. Price each.....\$2.00

American Beauty

A very choice red water lily. It possesses the same attractive combination of colors as the American Beauty rose. The flowers are 8 inches across, carried high above the water. Price each.....\$3.50

WHITE

Mrs. George H. Pring

A new water lily, pure white in color, flowers 8 to 10 inches across. Very fragrant and prolific. (See No. 1, Front Cover.) Price each.....\$2.00

(See page 7)

Snow White

A hybrid produced from the Independence through self pollination, the flowers are carried erect on a strong stem, are cup-shaped and 6 to 8 inches across. One of the best white tropical lilies. Our own creation. (See No. 3, Front Cover.) Price each.....\$3.00

*Isabelle Pring

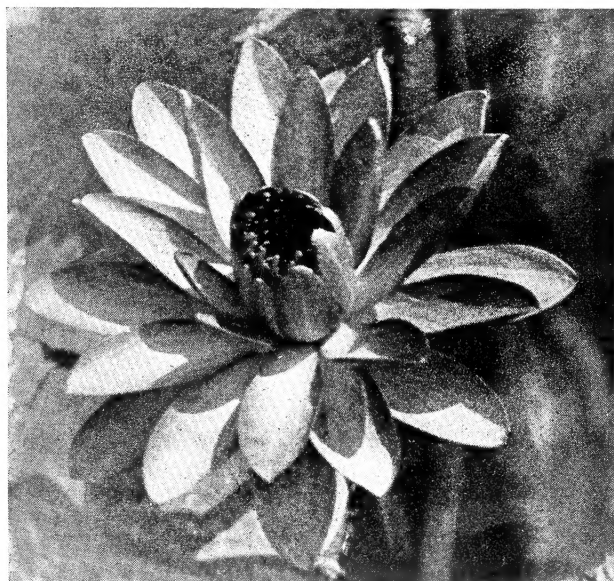

A strong viviparous day bloomer. Pure white. Price each.....\$3.00

*All lilies with star in front of name are viviparous, which means that young plants are produced from center of leaves. Tropical lilies should not be planted until latter part of May, or early June, and they should only be planted about 4 or 5 inches below water surface.

A new tropical Water-Lily is the variety William T. Innes. It produces lilac-blue flowers about 10 inches across. Price \$2.00

NIGHT BLOOMING TROPICAL WATER LILIES

Sturtevant

Victoria Crouziana

The leaves are 5 feet in diameter and the white flowers are 1 to 1½ feet across. Should be planted in at least 8 cubic feet of dirt and requires a water surface of 100 square feet at least to bring it to perfection. Only for very large pools. Price each\$10.00

Devonshire

Bright, rosy red flowers, 8 to 10 inches across, flowers well above the water. Price each.....\$2.00

Frank Trelease

The flowers are tyrian, pink with dark bronzy-red leaves. Price each.....\$1.75

Juno (Dentata Superba)

A magnificent white night bloomer. Flowers from 8 to 12 inches across. The petals are wide open and give the flower a flat appearance. Price each.....\$2.00

Rubra Rosea

A native lily of India, producing rosy carmine flowers, 6 inches across. The flowers are star shaped and borne freely. Price each\$2.50

H. C. Haarstick

A new hybrid produced by the Missouri Botanical Gardens. Its color may be described as a rare lavender-pink. The large flowers are carried well above the water and at times attain a size of more than 12 inches. The reddish-brown leaves are a beautiful addition. Without question the finest night bloomer. Price each\$2.25

Sturtevant

A beautiful bright red flower, 8 to 10 inches across, requires a large planting box for roots with plenty cow manure mixed in to bring it to perfection. Price each\$2.00

Omarana

Shaded pink in center and gradually diminishing in color until the tips are almost white. Flowers 6 inches across, a prolific bloomer. Price each.....\$1.50

Missouri

The best white night blooming tropical lily. Plant it in at least two cubic feet of rich soil to bring it to perfection. Price each\$2.50

Emily Grant Hutchings

A pink shaded night bloomer which produces immense large cup-shaped flowers. Price each\$2.00

Missouri

NOTE

Every pool should contain at least one of these varieties of lilies, as they bloom at nights when all other water lilies are closed; therefore, giving you flowers 24 hours of the day. We only list the finest new Hybrids produced.

Tulsa, Okla.

I want to tell you that I have had a great deal of pleasure out of the lilies I ordered this spring. Missouri is truly a sight to see, and the Mrs. Edward Whitaker is one of the loveliest lilies I have ever seen. It should take first prize in any flower show.

FAIRE REED.
Garlin, Ky.

The plants I received from you were nice indeed.
LOIS BURTON.

Egyptian Collection

1 Juno, 1 Omarana, 1 Rubra Rosea. All three for.....\$5.25

St. Paul, Minn.

Kindly disregard the first card I sent you; I guess I wrote too quick. The order arrived February 21; everything was in perfect condition. The plants sure add some color to my aquarium. In my estimation they are 100 per cent better than those I can buy locally.

MR. W. A. DONNERBAUER.

Independence, Mo.

My hardy water lily and other plants received. They are fine.

MRS. A. E. RANNIE.

Cloquet, Minn.

Received the plants in good condition and wish to say that I am more than pleased with them. HENRY DOLZER.

Emily Grant Hutchings

Victoria Crouziana

Mr. Martin Vander Vaer, of New Haven, Conn., is well pleased with plants received from us

BELDT'S QUALITY WATER LILIES ALWAYS GROW

Collection No. 27

No. 1. Blue Star.....	\$1.75
No. 2. General Pershing ..	2.50
No. 3. August Koch	2.00

**Special Collection Price
for this Crown Trio \$5.75**

These three Water Lilies photographed in natural colors are set against a background of natural color photograph of Blue Star Water Lilies in one of our pools. The Blue Star carries its flowers on strong stems about 2 feet or more above the water surface. Tropical lilies are fragrant, large and make ideal cut flowers.

Please Notice

Most of our tropical lilies will bloom at least one week after shipping. Lots of them are shipped with flower buds so that you may expect an immediate effect. Too often customers insist on early shipments, which is a mistake based more on inexperience on the part of the water gardener. In the latitude of St. Louis, Tropical Lilies should never be planted before May 20. Allow us to ship your tropical lilies at proper planting time and you will never be disappointed with results.

Joplin, Mo.

I received my order March 8, 1945. Everything was in first class condition and the plants were excellent; they were the nicest I have ever seen. I am sending the fish can back.

ROY E. IRELAN.

Algona, Iowa.

I received my plants on the eighteenth and was very much pleased; they were such nice, green, crisp plants. The food which came in the same order seemed to be much appreciated by my fish.

RANDALL S. CLARK.

Butler, Pa.

I had good luck with the water lilies I purchased from you last May. They bloomed well.

C. E. IMBRIE, M. D.

Chinese Camp, Calif.

I bought one Mexicana water lily from you about two weeks ago. I am very pleased with your water lilies. I got my Blue Star water lily today, and it was in perfect condition—and it came from St. Louis to California.

J. A. NICOLINI, JR.

Belleville, Ill.

I received my order in good shape and was very much pleased with the two Cryptocoryne Griffithi plants. They were very nice plants.

JACK VOLAND.

STAR LILIES

Gracillis Rubra (Red Star)—\$2.25 each

Stella Gurney (Pink Star)

Like all star lilies, the flowers are carried sometimes 18 inches above the water's level. The flowers are a pink shade and will attain a diameter of 8 inches. Price each\$2.50

Blue Star (William Stone)

A beautiful deep blue variety about 7 inches across, the flowers at times are carried 18 inches above water. A very strong grower and prolific bloomer. Price each\$1.75

Rose Star (Mrs. Ward)

The flowers are carried well above water and get about 8 inches in diameter. They are of a beautiful rose-pink color with long golden stamens. Price each\$1.75

Gracillis Rubra (Red Star)

This star lily has wine red flowers which like the other star lilies are carried well above water. Price each.....\$2.25

TROPICAL WATER LILIES

Collection No. 20 Our Beauty Collection

A group of four popular varieties, fragrant and prolific bloomers that attract attention in every garden. A very pleasing color combination. Flowers from 8 to 12 inches across.

1. Omarana. Each	\$1.50
2. August Koch. Each	2.00
3. Mrs. Edward Whitaker. Each	1.75
4. Mrs. G. H. Pring. Each	2.00

Special Collection Price \$6.75

H. C. Haarstick

A new night bloomer, which has flowers of beautiful shades of lavender-pink. Large plants will produce flowers of 12 inches or more in diameter. They are very strong growers and bloomers, and one plant will produce as many as 150 flowers during the summer months. The leaves are reddish-brown in color. A feature which makes it so much more desirable is that the beautifully colored leaves add greatly to the attraction of the pool. H. C. Haarstick should be in every collection. Price each

\$2.25

1 H. C. Haarstick and 1 Marmorata

(See Marmorata on page 7)

Special price.....\$4.00

Sturtevant

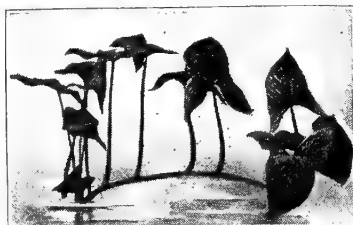

The newer hybrids have not been able to push this old-timer in the background. Still considered tops with many water lily fanciers. A red night bloomer that has everything.

Price\$2.00 each

New Trailing Arrow Head

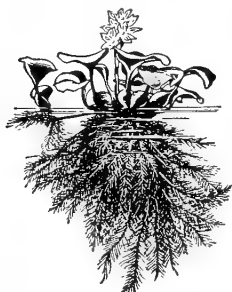

This new arrow head throws out long runners, some getting as long as 6 feet. It has beautiful, deep green, leathery, arrow-shaped leaves. This plant is not hardy but can be equally as well used as a house plant over the winter months. Very attractive in outdoor pools. Plant so that pot is half-way submerged in water.

Large plants.....\$0.50

Water Hyacinths

Dozen.....\$1.25
Besides Water Lilies there are smaller miniature plants that grow like lilies. Others float on the surface and some grow entirely submerged and produce oxygen. Include a few of these for practical purposes, as well as adding a little touch of variety.

Odorata Sulphurea Grandiflora

One of the best fragrant yellow water lilies. (See No. 7, Front Cover.) Price each\$2.00

Tropical Lily General Pershing
One of the best pink day bloomers. Each.....\$2.50

San Marino, Calif.
The last shipment of fish on order No. 2068 came through in fine shape. I must say that your fish are certainly fine specimens and excellent breeding stock.

CHARLES L. MOORE.

Omaha, Neb.
Thank you so much for sending me the Medakas; they arrived in fine condition, thanks to the wonderful way you packed them. I think they are beautiful. I also want to thank you for the wonderful service you gave me in sending me my fish so quick.

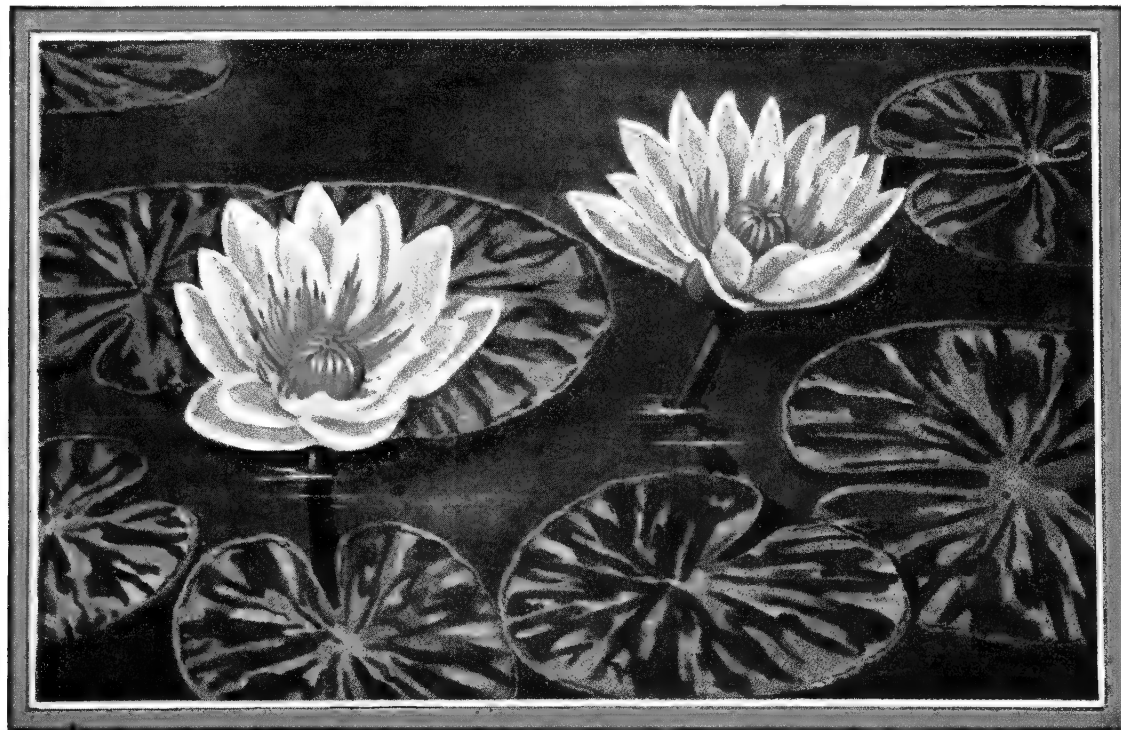

MRS. B. JENSEN.

Spencerport, N. Y.
Received your shipment of tropical fish, and wish to state I was more than pleased. I never had much confidence in receiving fish like that before, but in the future all of my aquarium needs will come from you. I am recommending you to some of my friends and hope they will give you a try, to discover the tops in service and fish.

CARL E. SANKEL.

Pensacola, Fla.
I will kindly inform you that I received your aquarium and pair of Blue Bettas which arrived safely, and I was very much pleased with them. Thanking you very kindly for such fine co-operation, I remain,

DORA JENNISON.

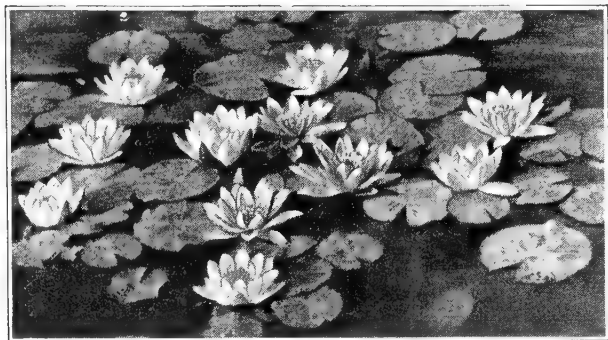

Marmorata

A lavender-blue day bloomer. A tropical lily with beautiful colored leaves. The color of the leaves is medium green with dark greenish-brown blotches. The leaves are an attraction as well as the large flowers which are produced in abundance. Price each\$2.00

POPULAR VARIETIES OF HARDY WATER LILIES

(All hardy water lilies are day bloomers)

Hardy Water Lilies: Comanche Chromatella and Morning Glory

Pink and Rose Shades

A beautiful flesh colored variety similar to Morning Glory; a very prolific bloomer producing flowers in abundance. Each.....\$1.25

White Pigmy

A dwarf, very hardy water lily, a prolific bloomer. Small, white flowers, about 1 to 1½ inches across, are produced in abundance; the green leaves are from 1½ to 2 inches across. Ideal for small pools. Each.....\$1.75

Red and Carmine Shades

Gloriosa

The blossoms are of a beautiful red shade, six inches across and very fragrant. It is a good plant also for tub culture, as the leaves are very small; however, it is equally as well at home in very large pools. Each.....\$2.50

Lucida

A beautiful deep red hardy lily and a very free bloomer. Each.....\$2.00

Red Marliac

Bright red flowers borne in profusion. Free flowering.....\$3.00

Wm. Falconer

Free flowering, velvety, very deep red, almost shaded to black. One of the finest red hardy lilies. Each.....\$4.00

Conqueror

A strong growing, deep red flower, very large. Stamens yellow-orange. Price each.....\$2.00

Attraction Day Bloomer

A French introduction, one of the finest hardy lilies ever produced. Flowers from 6 to 8 inches across. Upon opening the color of petals is garnet-red and the sepals almost white, stamens yellow, slightly touched with magogany. Price each.....\$3.00

Escarboucle

A very attractive variety, flowers being a uniform vermilion-red. Price each.....\$3.00

James Brydon

A free grower with rosy crimson flowers. Price each.....\$2.25

Sunset Shades

Masaniello

Large fragrant flowers, pink dotted carmine. Each.....\$2.00

Paul Hariot

Upon opening the first day the flowers are canary yellow. The second day they are shaded with pink and on the third day this pink suffuses the whole flower. Price each.....\$2.50

Comanche

One of the finest hardy lilies with changeable color, which on opening day is of a rich apricot shade, changing later to a deep bronze. Each.....\$2.00
(See Page 9.)

Aurora

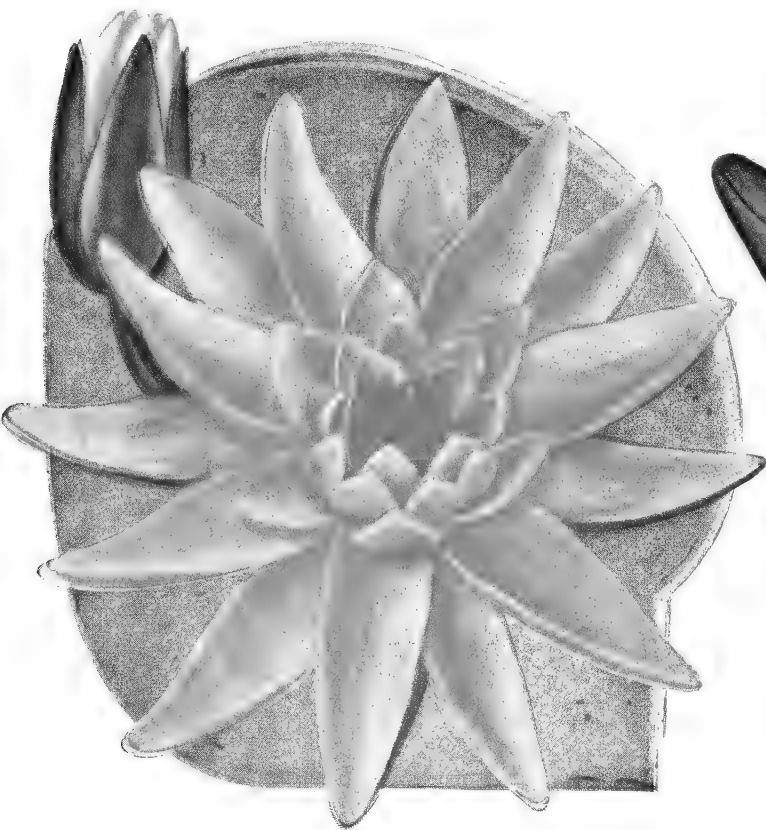

On the opening day this lily is light orange-red, changing to a very deep color as it gets older. Each.....\$1.50

Robinsoni

Famous French hybrid. The predominant color of the star-shaped flowers is a crimson-vermilion, shaded through the center with rich orange-yellow; the green leaves are maroon spotted. Each.....\$3.00

Hardy Lily — "Paul Hariot" — Price \$2.50

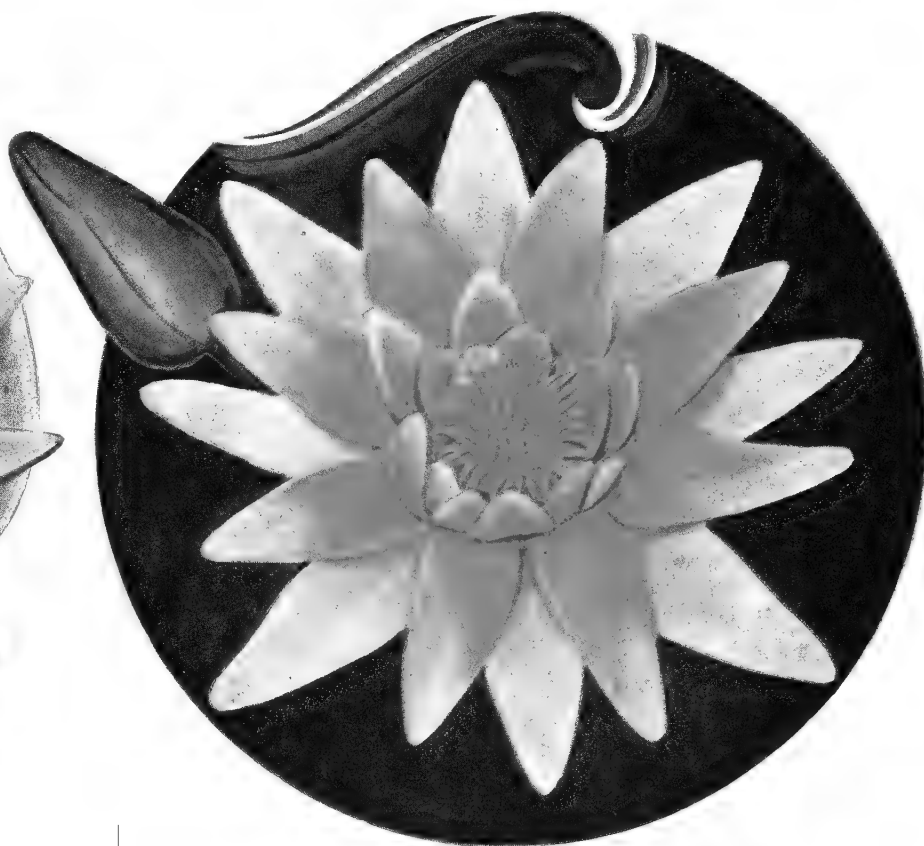

Hardy Water Lily

Rose Arey

Without question the finest hardy pink. The petals are long and oval-formed and uniform deep pink.

Each.....\$2.25

Comanche Hardy Water Lily

The rich apricot and red markings upon opening, changing to deep copper and orange shades, create a contrast so much that one lily seems to have several different colored flowers at one time. Vigorous and free flowering. Price each.....\$2.00

Shallow Water Plants

Shallow water plants add a decided touch to the pool. A pool properly planted with these plants does not look so artificial. A number of plants also thrive near the pool where the soil gets moisture from the water in the pool. If the pool is built on higher ground, there are ornamental grasses and other garden plants that can be used for back-grounds or the ends of the pool to complete a most perfect picture.

See Page 15 for Shallow Water Plants

NELUMBIUMS (Egyptian Lotus)

Lotus in My Pool

Photograph of Our Water Lotus

Our Lotus bed covers about three acres. It is best to plant Nelumbiums after the water has become warm, not before May 20, except in the south, when they may be planted after April 15. They should be planted in tubs 24 inches in diameter or boxes containing 12 inches of rich soil. The box should be 12 inches below water surface.

**Cyperus Papyrus (Paper Plant)**

Small plants, each.....\$0.35
Large clumps, each..... 1.00

LOTUS**Nelumbiums**

are hardy and they should be planted in one foot deep boxes filled with good rich dirt. The boxes should be about 2 feet square and the top of box about 6 inches under water.

MRS. C. J. KLEEMAN, Shuyler, Neb.

I have been dealing with your firm for the past two years and have been more than pleased with your merchandise and service.

R. W. LINDER, Chicago, Ill.

HEMEROCALIS FULVA

OUR WATER LILIES IN AUSTRALIA

This photograph was mailed to us by R. W. Mildred, 50 Hughes Street, North Unley, South Australia. Tropical water lilies are not grown commercially in Australia. We only shipped the tubers as this was much less expensive, and this picture shows the results of the quality tubers we are able to supply. Of course it is much easier if you can set out the lily plants already developed but in Australia, when we have summer here it is winter there, and it would not have been very practical for us to ship tropical water lilies during the winter.

BOG PLANTS FOR THE EDGE OF THE LILY POOL

WATER TARO

These plants grow best in shallow water near the edge of pool. If planted in boxes or flower pots in concrete pools, boxes should be raised within 2 to 4 inches below water surface.

Cyperus Papyrus

A quick growing trailing aquatic with waxy deep green leaves, yellow flowers. Hardy.

Each.....\$0.25 3 for.....\$0.60

Water Poppy

This nymphaea like aquatic produces a continuous mass of yellow flowers, the leaves are deep green and very smooth and float on the surface. Not hardy.

Each.....\$0.20 3 for.....\$0.50

Water Snowflake

A lily-like plant that produces an abundance of tiny white flowers which grow from the centers of leaves. Hardy.

Each.....\$0.35 3 for.....\$1.00

Thalia Dealbata

A hardy bogplant with stately canna-like leaves. Grows 2 feet high with purple flowers. Hardy.

Each\$0.40

Green Taro

The leaves and stems are light green. A good grower and very ornamental. Taros make nice house plants for the window and do well over the winter. They are not hardy.

Each.....\$0.40 3 for.....\$1.00

Imperial Taro

The leaves are light green and beautifully blotched in dark violet colors; grows about 2 feet high.

Each.....\$0.75 3 for.....\$2.00

Violet Stemmed Taro

The deep green leaves are pronounced through the addition of dark red ribs, grows about 2 feet high. One of the best.

Each.....\$0.75 3 for.....\$2.00

Thalia Divericata

A newer variety, grows 5 feet high, producing large clusters of purple flowers. Not hardy.

Each\$0.75

Water Iris

Water iris love a lot of moisture. They can be planted right in the water, and will grow in boxes several inches below the water surface, or they can be planted right at the edge of ponds or pools. All of these varieties will thrive best if they get a lot of moisture. They are also at home in the ordinary flower garden and can be grown just like any other iris in flower beds.

Pseudacorus Alba

White water iris. Grows about 24 inches tall. Pure white flowers.

Each.....\$0.35 3 for.....\$1.00

Pseudacorus Variegata

Variegated yellow water iris. Grows about 30 inches tall, producing variegated leaves during the spring of the year; at the end of the season turn green. Deep yellow flowers with very fine brown striped outlines.

Each.....\$0.50 3 for.....\$1.25

Pseudacorus Immaculata

A beautiful tall growing iris. Will grow about 3 feet tall, producing pure yellow flowers.

Each.....\$0.35 3 for.....\$1.00

Blue Flag

(Iris versicolor), a tall growing iris, producing beautiful blue flowers, the sword-shaped leaves resembling the Japanese iris. Hardy.

Each.....\$0.20 3 for.....\$0.50

Yellow Flag

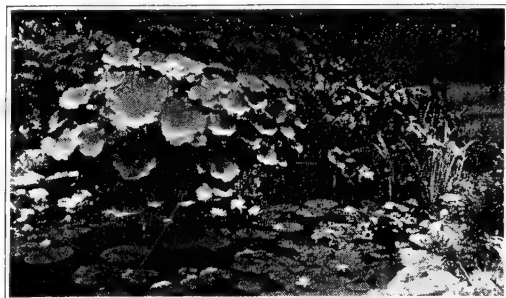

(Iris pseudacorus), very similar to blue flag, with large yellow flowers. Hardy.

Each.....\$0.20 3 for.....\$0.50

New Red Water Iris

A beautiful tall growing iris; flowers of deep red color; 24 inches. Hardy.

Each.....\$0.40 3 for.....\$1.00

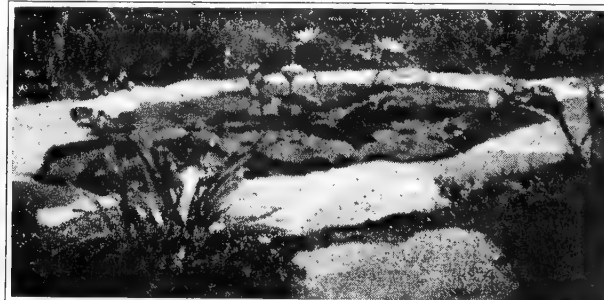

"LOTUS IN MY POOL"

This photograph was sent in by Mr. Sam Caldwell, of Nashville, Tenn. For larger pools having enough space for the planting of lotus (a box 24 inches square and 12 inches deep is sufficient), they can be highly recommended. They are very hardy and multiply rapidly. While many plants do not bloom the first year, quite often plants will make several flowers the first season.

This lovely pool belongs to Mrs. Kirstine Parker, Tremonton, Utah. Mrs. Parker was more than satisfied with plants received from us.

All plants listed in this catalog are priced f.o.b. St. Louis except when collections are specified postpaid. Kindly add postage to your zone.

Mrs. Clifford Nordberg, Abnandale, Minn., sends this picture of her pool and writes:

Dear Sir: My first pool and lilies have been such a success that I feel I must share a little of my joy with you, since my lilies came from your firm. The lilies were just beautiful and bloomed all summer. My Blue Star had as many as three flowers at once and at least four other buds ready to open. Mrs. Sawyer was also beautiful and bloomed all summer.

POOL PAINTS AND FERTILIZERS

Magic Water Lily Food

Beldt's Magic Water Lily Fertilizer and Plant Food

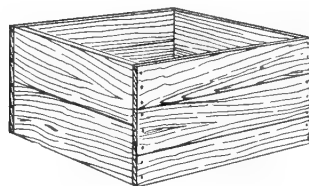

Has been perfected after years of experimenting. Magic does not foul or sour the water in your pool and leaves it absolutely free of foreign colors. In our experimental pools Magic Water Lily Food proved that flowers will double in size and that especially newly planted water lilies and all other aquatic plants will make as much growth in one month as they would in two months if planted in ordinary soil. Use 1 pint of Magic Water Lily Food to mix with 1½ bushels of soil. Complete directions with every carton.

1½ pint cartons, each.....\$0.50
5 lb. bags, each..... 1.25

Eau Clair, Wis.

I have had such wonderful results with your Magic Water Lily Fertilizer and Plant Food I thought I should let you know about it. You surely have it well named; it works like magic, and all of my lilies, also all of my other water plants, of which I have a great number which I bought from you, grow like Jack's bean stalk. Plants you have listed to grow 2 feet grow as tall as I am and I am 5 feet, 3 inches. Our garden soil is very poor, only sand mostly, but when I used it to plant my lilies and other water plants and put in your Magic Water Lily Fertilizer, you would be surprised to see what big, husky plants I have, thanks to your fertilizer.

MRS. FRED SCHLAGETER.

Special Water Lily Boxes

These boxes are shipped ready to use, and are made from special asphalt-treated lumber to last for years under water.

Size	Deep	Long	Wide	Price Each
No. 1	8"	10"	10"	\$1.00
No. 2	10"	18"	18"	1.75
No. 3	15"	22"	22"	2.80

Asphaltum Enamel

A new pool does not have to be seasoned if the pool is painted one coat of asphaltum enamel. The concrete walls must be perfectly dry when applying this enamel. Just give it one good coating, let it dry 24 hours and it is ready to be filled. Black asphaltum enamel also has the advantage of keeping algae from forming on the walls. We can supply this enamel in black, green and blue. One gallon of Asphaltum enamel will cover a surface of about 150 sq. ft., all depending on the smoothness of the concrete finish.

Per quart, Black.....	\$0.50
Per gallon, Black.....	1.75
In 5-gallon cans, Black.....	7.50
Per gallon, Green or Blue.....	4.00
Per quart, Blue and Green.....	1.20

We do not pay expressage on pool paints.

Asphalt Enamel cannot be sent by mail

Colored Lily Pool Paint

We highly recommend Sealment Water Proof Paint especially prepared for cement walls and lily pools. After testing many materials manufactured for this use we selected Sealment as the best. If Sealment is mixed properly and applied according to complete directions which are furnished with every can, it will last as long as the pool itself and forms a part of the pool and not merely a surface coating. It is ideal for stopping leaks in pools. Sealment contains no poisonous chemicals, however, on account of lime content, pool must be seasoned with change of water before placing fish in same. Sealment Water Proof Pool Paints can be supplied in following colors:

White, Blue, Green

Price per 5 lb. can for all colors except Green.....\$2.00

Price per 5 lb. can, Green.... 2.50

Directions

Five lbs. of Sealment Pool Paint will cover 150 square feet. Sold only in 5 lb. cans and we can not supply this in any other quantity. You will find complete directions for use with every can.

Hopkinsville, Ky.

My orders of water lilies, etc., arrived in grand shape. Thanks.

MRS. BEN WEBB.

Needles, Calif.

Attached is order for a few more fish. Several times in the past couple years I have made out orders for fish from you, then, after meditating over the matter, have destroyed them. This town of Needles is unique in one way: it has about the hottest climate in the United States. Chamber of Commerce advertisements to the contrary, I know. For that reason I was afraid a shipment of fish coming here from any distance would arrive cooked. I finally grew brave enough to try a small order, July 30. They arrived Sunday, August 9, in excellent condition. Water temperature was 70 degrees in the can, while temperature outside registered 115. I wouldn't have believed it possible had I not taken the reading myself. Even with coolers going full blast, temperature in my tanks averages 95 in summer time; but with heavy aeration, my fish seem to prosper and deaths are few. I believe your claims now, that you guarantee live arrival anywhere. I again express my appreciation for the excellent condition fish were received.

L. W. PARSONS.

Bellingham, Wash.

I wish you to know how pleased I am with the shipment of fish that I have just received. They are all alive and in very good condition.

RICHARD WARHARTON.

El Paso, Tex.

The shipment of tropical fish and plants came promptly and in excellent condition and I am much pleased with them.

A. R. FLETCHER.

Chillicothe, Ohio.

Everything was in very good condition and the fish were fine, of course. I haven't had an opportunity to try the heaters but I was very well pleased with them.

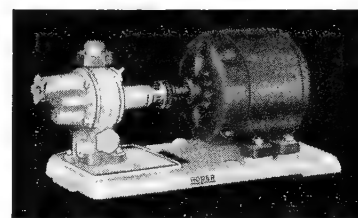

R. L. GALLIAN.

Needles, Calif.

Fish ordered from you August 25 received here afternoon of September 3. This shipment arrived in the same excellent condition as my first shipment. Temperature in one can was 72 and in the second can 74. Thanks a lot for the attention given this shipment and again thanks for your generosity in putting in the extra fish.

LEROY W. PARSONS.

WATER PUMPS

Circulating Pump

Capacity 250 Gal. per hour.

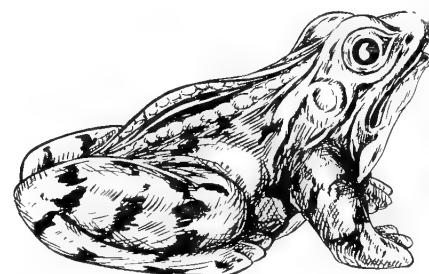

Price.....\$28.75

¼ H.P. motor. Floor space, 11 x 21 x 9" high. Shipping weight, 47 lb. AC, 110-120 volt. Standard.

Madagascar Dwarf Aquarium lily

Makes nice blue flowers above water. For tanks over 10-gallon capacity. Must be grown in pot with soil.

Each.....\$1.00

Dwarf Broad-Leaf Sagittaria

The leaves form a rosette and are about 1/4 inch wide and 3 to 4 inches long.

Each.....\$0.10 Dozen.....\$1.00

Ludwigia

Ceterophyllum
(hornwort)

Cellophane Plant

Cryptocoryne willisi

Cryptocoryne cordatum

Cryptocoryne Griffithi

AQUARIUMS CAN BE PLANTED AT ANY TIME OF THE YEAR

Water Lettuce

Water Fern

Banana Plant

Dwarf Anacharis

Hairgrass

Water Sprite

Southern Spatterdock

TRY BELDT'S GREENHOUSE-GROWN PLANTS IN YOUR AQUARIUM

Cardamine

A dainty aquatic producing light green leaves, $\frac{3}{4}$ inch across. Similar to Ludwigia. Propagates by runners or cuttings.

Per bunch.....\$0.35 3 for.....\$1.00

Water Sprite

A fern-like plant of light green foliage which is of recent introduction and has made many friends.

Each.....\$0.35 3 for.....\$1.00

Dwarf anacharis

A dwarf variety of elodea especially suited to smaller tanks but equally effective in larger aquariums.

Per bunch.....\$0.25 3 for.....\$0.60

Southern spatterdock

A beautiful foliage plant which has a delicate light green color.

Each.....\$0.25 3 for.....\$0.60

Round leaf spatterdock

A smaller variety with round leaves.

Each.....\$0.35 3 for.....\$1.00

Hairgrass

A well-liked small dense growing grass which forms small leaves about 4 inches long.

Per portion.....\$0.35

Banana plant

A novelty plant which is very popular. Grows from the seeds of the snowflake lily, the seed formation growth resembling a miniature bunch of bananas from which the leaves sprout.

Each.....\$0.25 4 for.....\$0.90

Echinoderus Radicans

Formerly known as sagittaria guyanensis. Broad green leaves, 5 inches long, are produced from a single root growth.

Each.....\$0.50

Water Snowflake

A lily-like aquatic plant; the leaves float on the water surface; requires sufficient sunlight.

Each.....\$0.35

Aponogeton fenestralis

Madagascar lace plant, the finest and rarest of all aquatic plants. The thick leaves form a lacy perforated growth.

Each.....\$10.00

Aponogeton Ulvaceum

A beautiful aquatic plant of recent introduction belonging to the Madagascar Lace Leaf family. Beautiful light green leaves about 5 inches long, forming a rosette.

Each.....\$1.75

Aponogeton Crispum

Also of recent introduction, produces medium green, curly edged leaves, all of which grow from a center root. A very attractive plant.

Each.....\$1.00

Amazon Sword Plant

The foliage is similar to sagittaria sinensis only stronger and the growth is more symmetrical and many more leaves are produced.

Each.....\$0.50 3 for.....\$1.35

Ambulia

A very beautiful aquatic having a foliage similar to cabomba, only a lighter green. Native in Central and South America. Large, bushy bunches containing 15 strands. Per bunch.....\$0.75

Potamogeton Crispus

A plant similar in growth to Ludwigia, except the leaves are long, much like cryptocoryne willisi but the plants grow more compact.

Per bunch.....\$0.25 3 for.....\$0.60

Fanciers' Special Collections**Collection No. 1**

Australian four leaf clover

A nice aquatic plant resembling four leaf clover. Each leaf is produced on a single stem.

Each.....\$0.25 3 for.....\$0.60

Lindstrom, Minn.

Our first order from you arrived about a week ago. We were more than pleased with the quality, with the excellent selection of aquarium plants, and with the generous quantity. They far exceeded our expectations.

GLENN KJELLBERG.

Mansfield, Mass.

The collection of aquarium plants arrived today. It is a superb collection and arrived in perfect shape. I shall be proud to tell friends where the plants came from. Until such time that I need more fish and supplies, I remain,

ALBERT J. VALENTE.

FLOATING PLANTS**Water Lettuce**

A floating plant requiring several hours' direct sunlight daily to bring to perfection.

Each.....\$0.15 3 for.....\$0.40

Floating Fern

The most popular floating plant does not require very much sunlight. Ideal for baby fish to hide over partly submerged leaves; young plants grow right from the leaves.

Each.....\$0.15 3 for.....\$0.40

Salvinia

Small leaves, $\frac{1}{2}$ inch across, are formed in clusters.

Per portion.....\$0.35

Duck Weed

A well-known small floating plant.

Per portion.....\$0.25

Water Hyacinth

A floating plant which is very popular for spawning, as the roots, which are dense and bushy, afford a lot of protection to the eggs. Used extensively in goldfish pools and for spawning tropicals.

Each.....\$0.20 Dozen.....\$1.25

Parrotsfeather

A trailing plant of light green foliage which grows above water level.

Per bunch.....\$0.20 Dozen.....\$2.00

Floating Plant Collection

Six varieties. \$1.50

Water poppy

A well-liked plant. The waxy green leaves reach the water surface and give a decided lily-like effect.

Each.....\$0.20 4 for.....\$0.75

Utricularia minor

Common name, Bladderwort. A dense growing floating plant, ideal for breeding purpose.

Per portion.....\$0.50

Crystalwort

Another well-liked floating plant with a light green foliage of fine crystal-like threads.

Per portion.....\$0.50

Chicago, Ill.

I have received my plants and am satisfied 100 per cent with them.

All of these fish get 12 inches long, are peaceful, and will mix with goldfish.

Kilgore, Tex.

I want to thank you for such prompt service; also, the fish I received this time were in fine condition. The Black Mollies were jet black and quite large. Thank you also for the catalogue.
J. B. PRICE, JR.

Torrington, Conn.

Received the shipment of fish Saturday and everything was OK.
GEORGE LORENZ.

Hansboro, N. D.

All the fish have arrived in A-1 shape, alive and swimming, and thank you for your generous replacement. I also find the little book by you very helpful.
W. E. H. PORTER.

Scottsbluff, Neb.

My order of two pairs of your tropical fish received last week. They arrived in perfect condition and are apparently thriving, although since their arrival they have been moved from my former address to my present. You may expect another and larger order from me in the near future. I ordered from you on the suggestion of a friend and you may rest assured that I will continue to order from you from now on. Thanking you again for your excellent stock, I remain,
LEON ARMSTRONG.

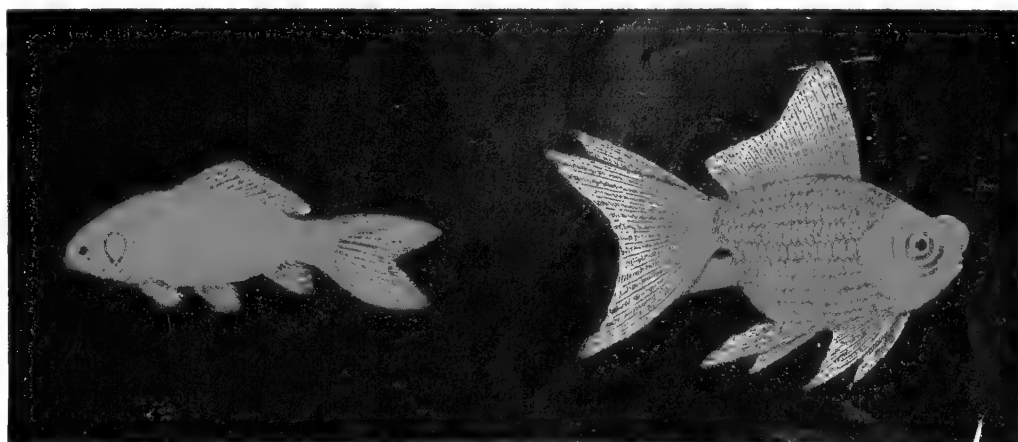

Oriental Collection

2 Golden Trout, 2 Red Carps, 2 Blue Carps, 2 Three-Color Carps, all about 4 inches long.
Special price, including shipping can.....\$7.50

Oklahoma City, Okla.
The shipment arrived today in good order with all fish very well. I am very well pleased.
B. E. ALLENDER.

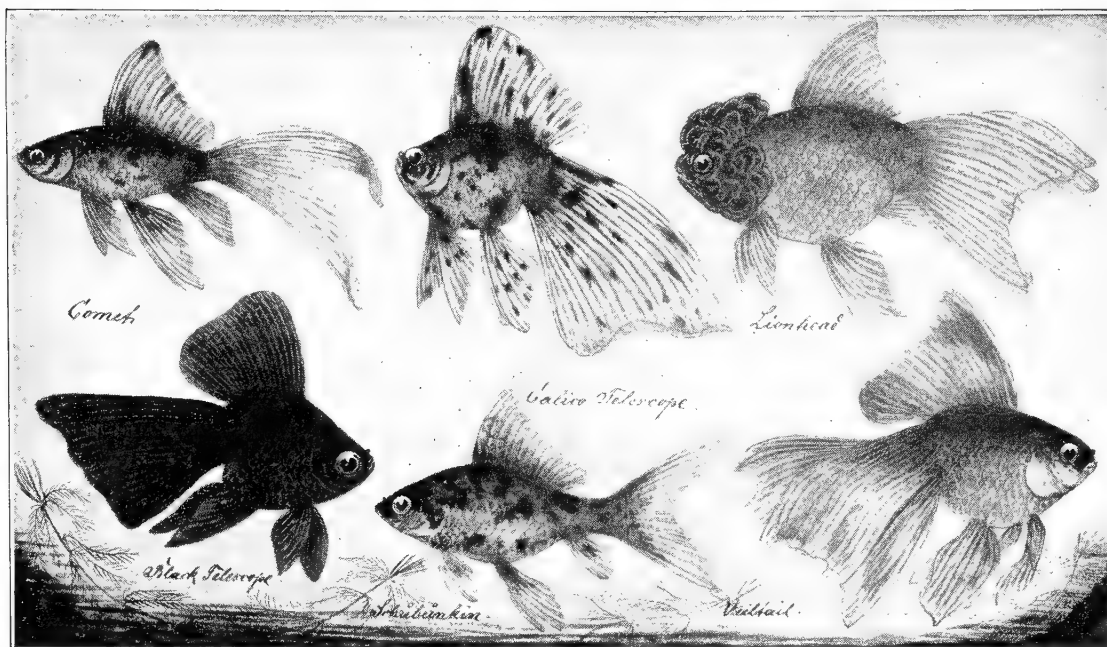

Ogdensburg, N. Y.
First, I want to tell you how pleased I am with the last shipment of fish. I wish all distributors were as dependable as Beldt's. ARNOLD'S TROPICAL FISH.

Tohatchi, N. Mex.
I also wish to tell you that the spawning size goldfish I sent to you for the last of April arrived in fine pep and condition. On their arrival I gave them for their home a 7½-gallon aquarium, with plenty of sand and plants, and fed them sparingly of the best balanced food, and gave them fresh water every day, and needless to say they seemed happy and comfortable from the first day. In just three weeks I counted 66 nice healthy little fish from their spawning.
MRS. J. W. COOK.

Read These Directions When Ordering Goldfish

Terms for goldfish shipments: All goldfish shipments are guaranteed beginning October 15 and ending June 1. No shipments are guaranteed between June 1 and October 15, and during this time shipped at buyer's risk.

Goldfish are shipped via express. We ship in small cans up to 24 of the smaller sizes. These small cans are not returnable and 35c should be added to your order for this can. We ship 50 fish in a 5-gallon shipping can. These cans cost 50c each and are not returnable.

Orders calling for more than 50 fish are best shipped in large galvanized goldfish cans, holding 10 gallons of water. A \$3.00 deposit is required on these cans, which must be returned, 31c pre-paid, from anywhere in the United States.

We guarantee live delivery on all goldfish. If shipment should arrive in bad order, notify claim department at once, get an inspection report and mail this to us together with the empty can and we will replace lost fish. If, however, the loss constitutes a value below 50c, then keep the report, send it to your local claim department for collection of value of loss. Kindly understand that unless we make a minimum provision so low as a 50c loss, it is merely to prevent claims that may amount to only 10c and the time and postage consumed in that case would be many times the actual value of loss.

UNCOLORED GOLDFISH FOR BAIT

Fishermen know that uncolored goldfish make the best bait minnows because they are hardy and do not have to be iced. You can keep them in your pool and have a supply on hand when you go fishing. Many of them may turn red later. Shipped in minimum quantities of 100 only.

Size 2 inch, per 100	\$2.00
Size 3 inch, per 100	3.00
Size 4 inch, per 100	4.00

Mixed sizes may be purchased in lots of 100.

Only Beldt's Aquarium Offers Such a Wide Selection of Exotic Fishes at Lower Prices

Our large volume of production enables us to save you considerable money on your Tropical Fish purchases. Our 20 years of experience in shipping and breeding Fancy Fish assures you complete satisfaction. You not only save money but you also get good and strong developed stock. Order your Tropical Fish from Beldt's.

ALL PRICES QUOTED ARE FOR LARGE BREEDING SIZE FISH

LIVE BEARERS

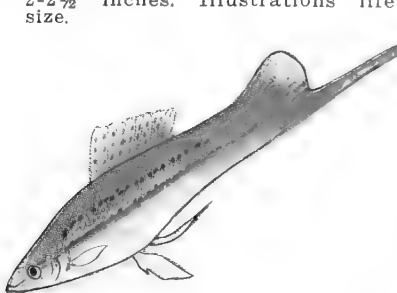

(Viviparous Killifishes)

These Fish Bring Forth Their Young Alive.

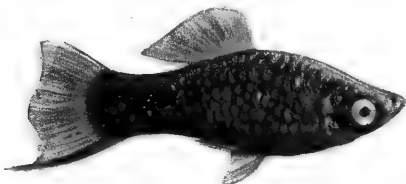

SWORDTAILS OR HELLERI

Live Bearer

Swordtails are very popular. They are native in Mexico and Central America. The male develops a long spike. The original swordtail here listed are the Montezuma and helleri. All other varieties are the product of line breeding and hybridization. Some of them grow to a length of approximately 3/4-inch when full grown. The average size is about 2-2 1/2 inches. Illustrations life size.

*Golden Swordtail, pair.....\$1.50
Young, each 40c or 4 for..... 1.50

*Black Helleri, large, pair.....\$2.00
Young, 1-1 1/2 inches, each..... .50
4 for..... 1.75

*Mexican Swordtails, large, pair.....\$0.75

*Young, each.....\$0.25 5 for.....\$1.00

*New Blood Red Swordtails, Med. size..... 1.25

*Breeding, Large, pair..... 1.75

*White Albino Swordtail..... 2.00

*New Black Swordtail: Grows long tail similar to the Mexican swordtail. A new introduction. Breeding pairs.....\$1.50

*New Black Swordtail with red background: We have developed a new Black Swordtail; however, this Black Swordtail has a red background and this fish unquestionably is the most beautiful of all the swordtail varieties. Breeding pairs.....\$2.50

*Domino Helleri

A hybrid Swordtail with 4 to 5 beautiful color variations, producing a short Swordtail.

Large breeders, pair.....\$2.00

Young, 1-inch, each..... .40
4 for..... 1.50

Live bearing, exotic fishes are very popular with the amateur, as no experience is necessary in order to breed these successfully. All you need is a good grade of prepared fish food so that the fish will have the proper nourishment, and nature will take care of the breeding end of it. Provide fine, bushy plants in the aquariums or separate the females and put them in a bowl by themselves when they look like they may be ready to have young.

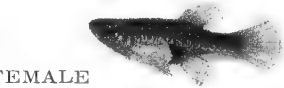

GUPPY

Live Bearer

Everyone acquainted with tropical fish knows the Guppy family. They are all very hardy and very prolific; being colorful and small, they can be kept in small vases and glass jars. The males reach a length of 1 1/4 inches, whereas some females will get as large as 2 inches; average size about 1 1/4 inches. All of our quotations are for breeding size fish, fully colored.

MALE

FEMALE

Guppy

*Guppy (Peacock fish)	Pair.....\$0.25
*Guppy (Chainback variety)	.75
*Spear-tail Guppy, Golden	.50

NOTE

All fish having "Star" in front of name can be mixed.

MOONS

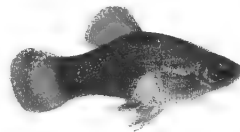

The Moons are one of the most popular live bearers. There are many color variations. A full grown Moon is about the size of our illustration here of the Red Moon. They are live bearers and are easily bred. Just simply provide bushy plants for the babies to hide in. All our price quotations are for matured and full grown breeders.

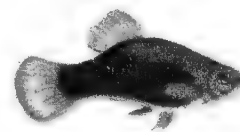

*Red Moon

Black Mollienia

One of the most popular aquarium fishes. They bear their young alive and are very hardy. Prices are for jet black specimens.

Per pair, \$2.50

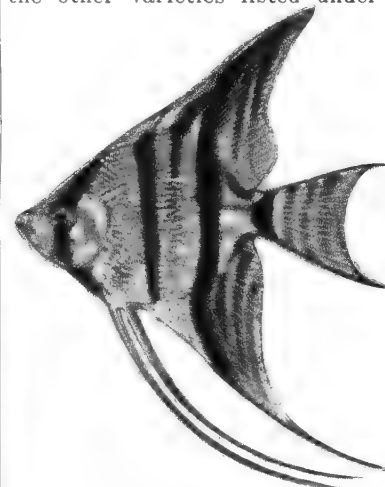

Per pair, \$1.00

Per pair.....\$0.50 3 pairs.....\$1.25

CICHLIDS

Most of these fish are from South America. The Amazon Basin offers quite a variety of these miniature foreign fishes. The Scalare or Angel Fish is a member of this family, as are all the other varieties listed under

Pterophyllum Scalare (Angel Fish)

*Scalare (Angel Fish).

*Young, pairs.....\$1.50; 6 for \$ 4.00
Young breeders, each..... 2.50
1-year-old breeders, pair..... 7.50
Extra large, full grown pairs..... 20.00

this heading. Most all of them lay their eggs on hard, smooth surfaces and when the eggs are hatched, take care of the young. An exception to this rule is the mouthbreeder. The female carries the eggs in her mouth for about ten days to two weeks in a special pouch. Their interesting breeding habits, and also their beauty, has made Cichlids one of the aquarist's favorite fish and no collection is considered complete without them.

(Cichlids continued on page 22)

We guarantee live delivery on tropical fish shipments, and upon receipt of inspection report replace losses, except when loss is less than \$1.50, in which case we issue credit for full amounts. Beginning December 10 and ending February 20 tropical fish shipments are made entirely at buyer's risk. Weather conditions at this time of the year are too cold, and some shipments are bound to suffer from low temperatures. When receiving shipments during this time of the year it is understood that you will file your own claims with the railway express agency for losses.

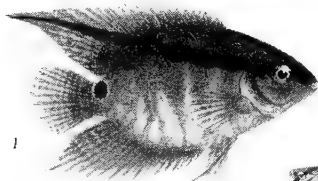

Cichlids—Continued

How We Ship Tropical Fish

All tropical fish are best shipped in insulated containers the year round. They thrive best at a temperature between 65 and 80 degrees F. During cold weather, more insulation is used to keep the water warm. During hot weather, insulation is necessary to keep the water from becoming too hot, but less insulation is required during the summer months. We supply these insulated (not returnable) shipping containers for 75c each, and this amount should be added to your order for tropical fish. If the order is small and for smaller fish, we pack them as light as possible in a smaller container in order to save expressage; should the value of the container be less than 75c, we will add an extra fish to make up the difference.

Extra heavy insulated shipping containers are used during severe cold weather; also chemical heating pads. If you wish us to use these special containers during the winter months, simply add a \$3.00 deposit to your order. We refund the deposit after this container is returned to us, 31c express prepaid from anywhere in the U.S.A. We make a rental charge of 25c per week if you hold the container and fail to return same within one week after receipt of shipment. Please return these special shipping containers promptly. Thank you!

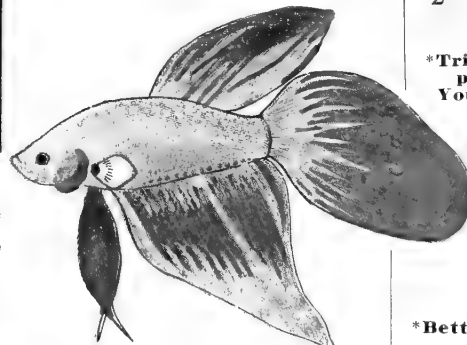

We do not assume responsibility for any losses after you give the express agency a clear receipt. In case the shipment has been damaged or if there are any dead fish in the can, call the claim department. Get an inspection report; mail it to us with order number of shipment, which you will find on the address label. Be sure to get a detailed report covering damage. The carriers are liable for any damage to shipments and you can file your own claim by simply making out a bill of this loss and attach bad-order report to this bill and mail to your local claim department.

Betta Cambodia

Large Veiltail Breeders
Pair \$2.00

Young, each\$0.35

Showing the variations in colors from red to blue. The blue, green and red Bettas here listed are solid colored fish. Body and fins of one color.

Red Betta, large veiltail breeders, pair.....\$2.00
Green Betta, large veiltail breeders, pair.....\$2.00

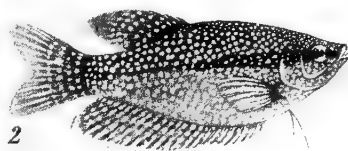

*Macropodus Cupanus, pair...\$1.00

Labyrinth Fish

These Fish Build Bubble Nests

All Labyrinth Fish listed here are native in Southern Asia, such as India, South China, Island of the Burneo. All of these varieties build nests under floating leaves so that the nests are protected from rain. These nests are formed through the use of mucus and tiny plant life such as algae. Some varieties do not bother about building any nests. The eggs just float on the water's surface and are guarded by the male. Most all of the eggs hatch in 36 hours.

*Trichogaster Leeri, large; pairs.....\$3.00
Young, each75

Special Panchax Collection
(Egg Laying Killifish)
Miniature Tropical Pikes

Special Collection No. 7

Collection Price—
5 pairs \$8.00

No. 36	Panchax Panchax.	Per pair	\$1.75
No. 37	Epyplatys chaperti.	Per pair	1.75
No. 38	Pachypanchax Playfairii.	Per pair	1.75
No. 39	Chrioeps goodei.	Per pair	1.00
No. 40	Aphyosemion (Ribbon tail panchax).	Per pair	2.50

Here is a collection of extreme interest for the advanced aquarist as well as the novice. Killifish are quiet and will, sometimes for several minutes, stand in the same position without showing a sign of life. When food is thrown into the aquarium they dart quickly and snap the food. They can jump after the food high out of the water. The aquarium should be covered with glass.

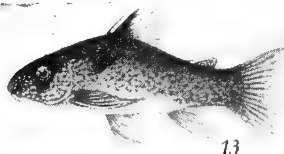

South American Armored Scavenger Catfishes (Corydoras)

Illustrations are natural size. These small catfishes are peaceful and good scavengers, very interesting, popular and hardy.

Corydoras aeneus
Colors, golden green shades.

Summer shipping cans, \$0.50 extra. Winter shipping containers, \$0.75 extra.

SILVER BRAND FISH FOODS

A good fishfood is essential to keep the fish in good health. Our "Silver Brand" fishfoods are the finest scientifically prepared foods for all aquarium fishes. We have years of experience breeding tropical and goldfish, and inferior foods result mostly in sick fish, lost colors and run down conditions. Many fanciers are not aware of the fact that a poor fishfood results in diseases which no remedy will cure, because the fish are too run down to respond to any treatment. In many cases only a good fishfood is all that is required to bring them back to health instead of a lot of chemical preparations. Request your dealer to stock our foods and do not accept inferior brands made by people who never owned a fish in their lives. All of our high grade fishfoods, put up in glass jars to keep them fresh and moist, do not contain any kind of filler such as meal or flour to produce quantity instead of quality. Most of these fillers produce constipation and the fish are soon run down and subject to all kinds of diseases. Stop using them and you will have better and healthier fish.

INTERESTING BOOKS FOR THE FISH FANCIER

"Exotic Aquarium Fishes."

By WILLIAM T. INNES

This 460-page book with 41 color plates and 290 black and white illustrations is one that everyone interested in Aquarium Fishes should own. It contains only such fishes that have actually been imported, giving the popular name (if any), the scientific name, its pronunciation and meaning, the native habitat and a key reference to a world map, which is printed on the fly-leaf. There are also 7 maps which show the world distribution of the 7 most important families of Aquarium Fish; 78 pages are devoted to Aquarium Management, Plants, Diseases, Enemies, etc. There are also sections on Wholesale Breeding, Collection and Transportation, Miscellaneous Information, and Rules for Fish and Aquarium Competition.

One is at once impressed by the quality print job, which is most outstanding. The author must have put his heart and soul into this book. When going through the pages you imagine he is talking to you in person. The only thing missing is his photograph. By far the best book on this subject.

New 6th edition, price \$6.00

The Aquarium

A monthly magazine published in Philadelphia. This is a real fish fancier's magazine.

Subscription per year \$2.25

"Guide to the Study of Fresh Water Biology"

By

JAMES G. & PAUL R. NEEDHAM

88 pages. Only the things which are commonly collected in fresh water are included in the book. It covers Insects, Crustaceans, Molluscs, Plancton Protozoans, Arthropods and many subjects too numerous to mention. A fine book covering the subject in a most complete manner.

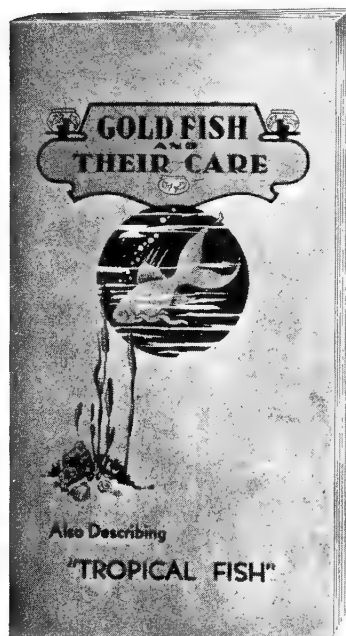

Price \$1.50

"The Modern Aquarium"

By WILLIAM T. INNES

A very good book for the beginner, with 30 illustrations and 64 pages crammed with information describing goldfish, tropical fish, aquatic plants, insect enemies, breeding habits, fishfood, snails, aquatic plants, etc.

Price Postpaid \$1.00

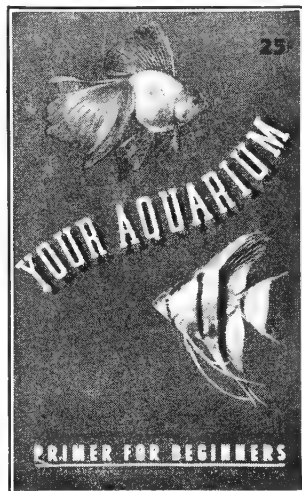

"Goldfish and Their Care"

By OTTO BELDT

This 24-page booklet contains 20 illustrations and a beautiful two-color cover.

It describes popular aquarium fishes, plants, diseases and treatments, etc.

Postpaid 15 Cents

"Your Aquarium"

by WILLIAM T. INNES

A 32-page booklet, well illustrated, for the beginner. It explains so that everyone can easily understand all of the fundamentals of aquarium success.

Postpaid 30 Cents

Lynn, Mass.

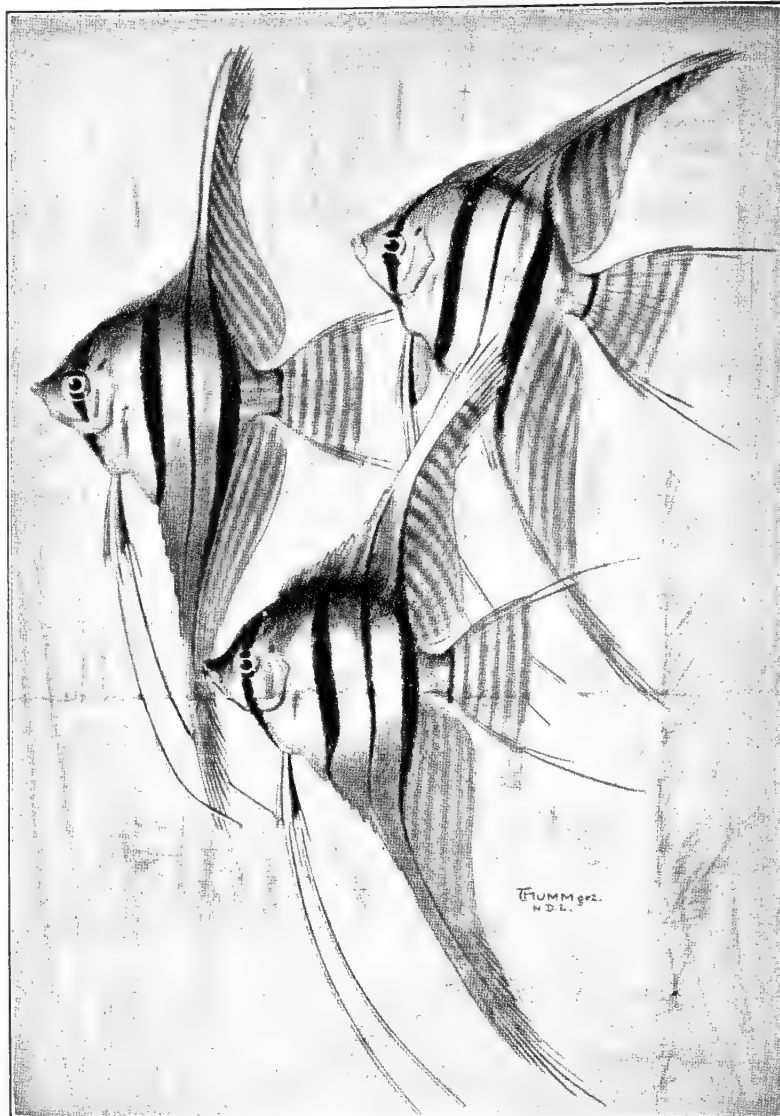

I received my shipment of Tubifex Worms; also Lily. Both arrived in satisfactory condition.

LLOYD K. DUTTON.

Tropical Fish Color Chart

Illustrating 90 fish in natural colors. Size 19x28 inches. Also gives habitat and breeding habits.

Price Postpaid \$1.00

Pterophyllum Scalare

The most popular aquarium fish. Breeding pairs, the size of this illustration, can be supplied at \$5.00. Smaller size, pairs \$1.50; 3 pairs \$4.00. Larger fish up to \$25.00 pair

LIVE FISH FOODS

White Worms (Enchytra)

Large portion, \$1.00

To propagate white worms, fill a small box about 12 inches square and 12 inches deep with good garden soil to a depth of 8 inches; keep a piece of slate or glass on top to keep soil from drying. Keep dirt moist. Feed mashed potatoes, boiled rice, bread soaked in milk. See that all food is covered with dirt. Breeding temperatures best between 50 and 75° F.

"Fishes in the Home"

By IDA MELLEN

178 pages with many illustrations covering various subjects, such as the model aquarium, various aquarium snails, fancy goldfish, rotifers and infusoria. Also various native minnows which can be collected for the aquarium. Many varieties of goldfish, etc. An excellent book.

Price \$2.00

Tubifex Worms

A small reddish colored worm, similar to white worms. They will live under water for months, making it possible to feed your fish enough for several days if you are away. Per portion,

Including shipping can \$1.50

Brine Shrimp Eggs

The eggs will keep indefinitely. Young hatch in 24 hours, and make ideal live food for tropicals. Full directions with each package.

Per carton 75 Cents

Live Daphnia

If you wish to raise your own daphnia, get a can of live daphnia and one package of our Infusoria Powder, which is also used for raising daphnia. Complete directions with every package. Live daphnia, including shipping can \$1.50

Infusoria Cultures

Various microscopic life forms the foundation of water life. Without these creatures there would hardly be a living thing in water. Infusoria is used for feeding tiny baby egg-layers of all tropical, goldfish and most all fresh water game fish subsist on this microscopic life during the first few weeks of their existence. We can supply following cultures: paramecium, philodino, Euglena, and monostyla. These cultures cannot be shipped in zero weather on account of water freezing.

Each \$1.00

Magic infusoria powder, 50c additional.

AQUARIUM MANAGEMENT

Aquarium Management

Never use gravel or too many shells for the bottom of an aquarium. Food and refuse will accumulate among them, because fish and scavengers have no access to it. It will cause the water to spoil and roots of plants to get black, and acid conditions resulting in the death of your pets. Use only clean river sand, one that is not too fine, yet not too coarse. Never place the fish in fresh water, it contains too much oxygen, also too many chemicals. After aging water for about a week, it is much safer than fresh water. A positive prevention against disease is to heat the water and let it age for about a week. All danger of ich can in this way be eliminated. Never keep the water in any kind of metal containers. Green water is caused by excessive sunlight or insufficient plant life. Two or three hours of direct sunlight per day is not too much. If the aquarium gets green it will clear up if covered with brown paper. Also floating plants help keep it clear. If you can not provide an eastern or southern exposure get an electric reflector and let it burn at least two hours in the evening; it stimulates plant growth. Bad smelling water is

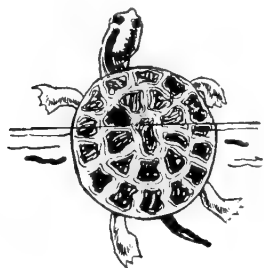

the result of either too much food or the wrong kind. Do not underestimate the value of sufficient plants and some scavengers. When cleaning your aquarium try to save as much of the old water as possible. Strain it through a towel and use it over as it is much safer than too much new water. As a rule one-third new water never gives any ill effects even if it has not been aged, just so it is tempered properly. Occasionally syphon off the dirt on the bottom and replace it with fresh tempered water; this is more beneficial than harmful. It is best to keep two aquariums, one to use for quarantine purposes of newly purchased fish. Observe them for a week before placing them with your valued stock. When you get fish via express save all the water in which they come, and add old water to same. This will minimize the difference in chemical contents of the water. It also is a good precaution to add two drops of fungus remedy to the water. Good, clear water in an aquarium is very essential. It contains more oxygen and creates a better plant life. Plants absorb the impurities which create carbonic acid gas and throw off oxygen which the fish require. Therefore, a balanced condition can be created by

keeping a certain amount of plants and fish life in an aquarium, and such an aquarium does not have to be cleaned more often than once in six months to one year. Science has made aquarium keeping extremely simple. Automatically controlled aquarium heaters are perhaps the greatest benefit ever devised for the tropical aquarium. The proper temperature is from 72 to 80 degrees F. Chemical aquarium testing kits will help you determine the exact acid or alkaline conditions and the chemicals coming with these kits help you to neutralize the water. Unless one intends to go in for breeding, scientifically prepared foods usually cover a most complete diet. Medicated aquarium balls will help to prevent acid conditions. Feed as much food as the fish will consume in about thirty minutes. Use the dip tube to remove excess foods and refuse from the bottom occasionally. The glass may be kept clean with fine steel wool; small pieces of steel wool which may drop in the water are not injurious, but rather beneficial. Air pumps are a great aid for large community tanks. Many more fish may be kept in an artificially aerated tank than if you only depend on the function of plant life. Glass feeding rings

are more necessary than most fanciers realize. How would you like your dinner spread all over the table? Feeding rings help keep the aquarium clean. Glass covers are necessary on all heated aquariums, they help to retain the heat; many tropicals also like to jump out. A few bushy floating plants such as Utricularia minor (Bladderwort) or potamogeton densus in which newly born fish may hide prove one of the best paying investments. Do not be pennywise and pound foolish. Before investing a dime in fish, secure the proper equipment to keep them. Too many beginners make the mistake and invest \$3.00 in a cheap tank and heater and seven dollars in fish. If this investment were reversed, you would profit in the end. Do not try to start the fish hobby without first reading a reliable book on this subject. Investigate before you invest.

Demand Our Goods From Your Local Dealer

Many dealers carry our supplies, such as foods, aquariums, fish, plants, and supplies. If your dealer does not stock them, demand them, and he will be only too glad to stock them for you. We shall be glad to have your dealer's name and address.

Tripod Magnifier

The Tripod Magnifier is highly satisfactory for students' use in elementary Nature Study, such as Biology, Botany, Entomology, and other simple laboratory tasks.

This microscope is of the tripod type and is placed directly over the specimen to be examined. The magnifier is a double lens type of 7.5X in a threaded mount for focusing.

This mounting makes this magnifier desirable for a wide variety of work where simplicity and low cost are essential.

This magnifier is very good for testing infusoria cultures. For best results place a drop of the culture on a small mirror.

Price each.....\$1.25

Pocket Magnifier

This powerful magnifier supplied with 2" lens on revolving leather case. Ideal and handy for the fish fancier for checking infusoria, etc.

Each.....\$1.25

Washed Meramec Sand for Aquariums

It is very important to use the right kind of sand for the bottom of an aquarium. Meramec sand answers this purpose. White sand packs too tight and does not allow the roots of plants to grow right; on the other hand, if sand is too coarse, fishfood and refuse collect among same, causing water to decompose and get cloudy. Meramec sand is put up in the following size packages:

Size	Each
5-lb. carton.....	\$0.40

BELDT'S RELIABLE REMEDIES

**Magic Infusoria Powder**

Size of Package, 4x2½ Inches
Beldt's Magic Infusoria Powder

One eight-ounce box is enough to produce fifty gallons of infusoria. When breeding egg-laying tropicals or goldfish, the young, after they are able to swim, must be fed on infusoria. All young live bearing fish can be fed on infusoria for about ten days. This powder, which is guaranteed to produce the best infusoria culture, should be on hand. In case you do have some egg-layers to spawn, you will need these small infusoria microbes for food.

Price per can.....\$0.50

Beldt's Fungus and Ich Remedy

This is the most effective remedy for fungus, tail rot, and especially ichthyophthirius on tropical fish. Symptoms: Folded fins, fish wiggle, and seem to be unable to swim, scratch themselves on sand. Tropical fish have tiny white spots on bodies—cotton-like growth. This remedy should be on hand as these diseases are contagious and spread rapidly. Complete directions with every bottle.

Price, 1-oz. bottle.....\$0.30
 3 for \$0.75

Nashville, Tenn.

The Ich and Fungus Tonic you sent me works wonders. I put 10 drops in my 10-gallon aquarium, as I had just added several new fish. The water turned blue for several days, after which the algae in the water was entirely gone, the fish were much better looking and all the plants and snails were in very good condition. I think you should add in your next catalog that this tonic also kills algae and not to be distressed over the water turning blue.

FRANKLIN C. POE.

Los Angeles, Calif.

I used your Ich and Fungus Remedy and am so pleased with the result.

A. BURGE.

Omaha, Neb.

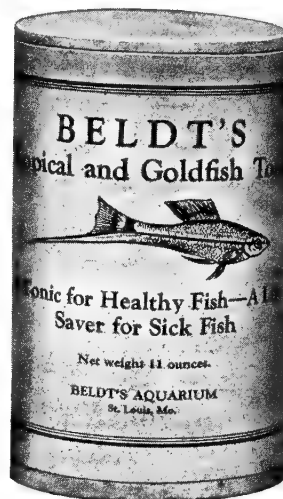

Since receiving your Ich and Fungus Remedy my fish are well and happy again.

MRS. B. JENSEN.

Fargo, N. Dak.

Your aquarium has as yet shown no defects—it's a beauty. Your Ich Remedy deserves praise also.

GEORGE TRUESDELL.

**Beldt's Gold and Tropical Fish Tonic**

A tonic to be used for sick as well as healthy fish. Its main purpose is to create pure water conditions and keep aquariums free from diseases. It is a remedy for sick fish, and a good tonic for well fish. It is greatly advisable to use this tonic when starting new aquariums. Complete directions with every carton.

Charleston, W. Va.

My pool is 100 per cent better since I placed these *Gambusia Affinis* in the pool.

MRS. LILLIAN REVEAL TREVILLIAN.

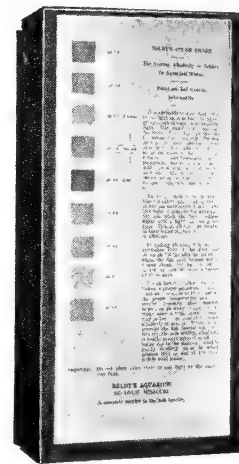

Potassium Permanganate

Destroys algae and clarifies green water in aquariums and outdoor pools. Also a good remedy for tail rot on goldfish. Complete directions with every bottle. 4-oz. bottles.....\$0.35

Potassium permanganate tablets can be supplied in following sizes: 1-grain, ½-grain and 5-grain tablets with directions on each bottle. Price.....\$0.40

Turks Island Salt:

A solution of two level table-spoonfuls of Turks Island Salt per gallon of water makes a tonic which is beneficial to all minor ills. Fish should be left in this bath for several days. Per pint ctns., \$0.35; per quart ctns., \$0.50.

**Beldt's Aquarium Testing Kit**

This kit contains chemicals to neutralize water in case it is acid or alkaline. It contains the testing liquid test tube and color chart to show you exactly how the water tests. Extreme alkaline or acid conditions of water are very harmful to fish and many times diseases can be cured or prevented. If you have trouble with your aquarium, test the water.

Price complete.....\$1.75

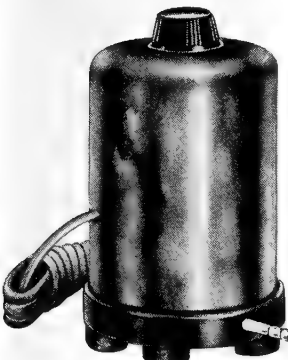

**Beldt's Sulphuro Fish Remedy for Tropical and Goldfish**

Directions for its use come with every bottle. Price.....\$0.50

Jesup, Iowa.

I am writing to tell you how much I appreciated the information you gave to me about my fish, and the treatment you recommended for black fungus. The Special Pool Remedy has done wonders for me. It has almost entirely cleared the pool. The fish were quite badly infested, and I sure do think that the results are wonderful. You can use my name for a recommendation if you wish.

No. 5	9"	19"	6.95

Brookline, Mass.

The acknowledgment of the arrival of my fish arrived the day after the little devils themselves came. Thanks anyway. They are very nice fish, and quite reasonable. I don't buy small fish because of cheapness in price, but because they withstand transportation better, having more vitality. The Moons and Gouramis act as though they have lived here all their lives and are quite frisky. The male Gourami is king of the tank and attacks snails with glee. The Mollies had babies on the way and have taken the trip with less stamina than the others. Am afraid the baby Mollies have swim-bladder trouble.

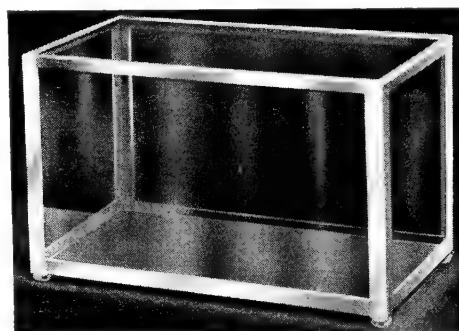

JULIAN R. SEIDE, M.D.

Welded Angle Iron Aquarium Stands

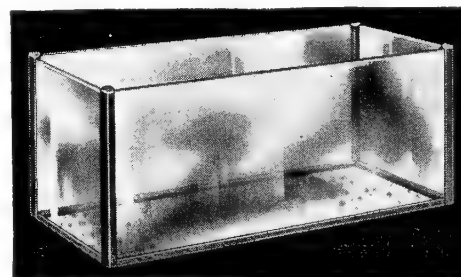

These stands are only made to special order. If you need a good, strong, welded aquarium stand, order one of these. Green lacquer finished. Price includes crating and boxing charge.

New type worm feeder; comes with cork ring support instead of glass as illustrated. Each.....**\$0.35**

Automatic Syphon

This simple little device automatically empties bowl and aquariums. Just put it in the water as shown in illustration and the water starts running of its own accord. It is much safer to carry an empty bowl than a full one. Price each **\$1.25**

SCAVENGERS FOR AQUARIUMS AND POOLS

Do not try to keep an aquarium or a pool without the proper kind of scavengers. They are very important in keeping an aquarium or pool clean. Clams should never be used in an aquarium. They should only be used in pools, as the average aquarium is much too small. Figure at least one snail to the gallon of water when keeping an aquarium, and if you use the large Japanese snails, use at least a dozen snails for each 50 gallons of water in the pool, and figure one Weatherfish for each 10 gallons of water in the aquarium besides the snails.

Water Newts or Salamanders are very interesting, but have no scavenger value. Tadpoles make very good scavengers in both pools and aquariums. Scavengers consume very little oxygen and, therefore, will not overcrowd the aquarium.

Add 25c for postage and packing charges on snail orders amounting to less than \$1.50, unless ordered with other supplies.

No. 1—Red Ramshorn Snail

Each.....\$0.15 4 for.....\$0.50

No. 1—Black Ramshorn Snail

Same as the Red Snail only it is black. Very hardy.

Each.....\$0.05 6 for.....\$0.25

DIRECTIONS TO CUSTOMERS

WHEN WRITING IN REGARDS TO YOUR ORDERS

BE SURE TO MENTION ORDER NUMBER

Forwarding

All shipments of live stock are forwarded via express; also all glass articles. We guarantee glass articles only if forwarded via express and in case of damage in transit will replace all articles gratis only if a bad order is obtained from express company and mailed to us. We do not pay express charges on replacements or on original orders. We do not guarantee live stock sent through mail.

We do not pay postage or expressage on any shipments. All price quotations in this catalog are strictly net F. O. B. St. Louis except on items listed postpaid. Do not remit any money to cover express charges as these are collected when the express man delivers the goods. If you desire items sent parcel post, make your remittance large enough to cover postage. We can not guarantee parcel post shipments against damage or loss.

Correspondence

We cannot give detailed information concerning breeding habits, etc., of fish. In order to properly do so would require hours of writing concerning some of the varieties. Include with all inquiries a self addressed and stamped envelope.

Claims

We can not entertain claims unless they are made within 3 days upon receipt of shipment.

Cash with Orders

Please send sufficient money with order to cover the whole bill. We decline to ship "Collect on Delivery" unless 50 per cent remittance be made to guarantee acceptance.

Shipping Cans

See directions for Goldfish shipping cans on page 20.

Tropical Fish Shipments

We do not guarantee tropical fish shipments unless permitted to ship in insulated cans. If ordered shipped in your own special can, they travel at your risk.

Shipping terms regarding tropical fish shipments: We do not pay express charges on original shipments or replacements on tropical fish orders. All tropical fish shipments are made express collect. We do not guarantee live delivery on any shipments traveling more than 1,000 miles from St. Louis. We cannot guarantee the live delivery of any tropical fish where the value is over \$1.00 per pair; these are shipped at buyer's risk.

For further instructions regarding tropical fish shipments, see Page 22.

Shipping Season

We ship everything listed in this catalog all year around. During cold weather tropical fish are shipped in thermos cans. We reserve the right to delay orders, should weather conditions arise that may call for delays on shipments, and such delay, in no way, should be a cause for cancellation of orders.

Canadian Shipments

Obtain a permit to import plants from the Department of Agriculture, Ottawa, Ontario. Send us permit number. You keep the original copy of permit.

Non-Warranty

Various conditions, such as unfavorable weather, improper planting, etc., may cause poor results. We send out only first quality stock, but we give no warranty as to productiveness or description.

Selecting Tropical Fish

Not all varieties listed can be shipped in one can. Customers desiring only such varieties that can be kept together in one aquarium should order those marked * which are known as "Happy Family Fish."

Pairs

Quite often a fancier wishes to match odd fish in order to pair them. You can purchase either sex at one-half the catalog price as quoted for pairs, except Veiltail Bettas.

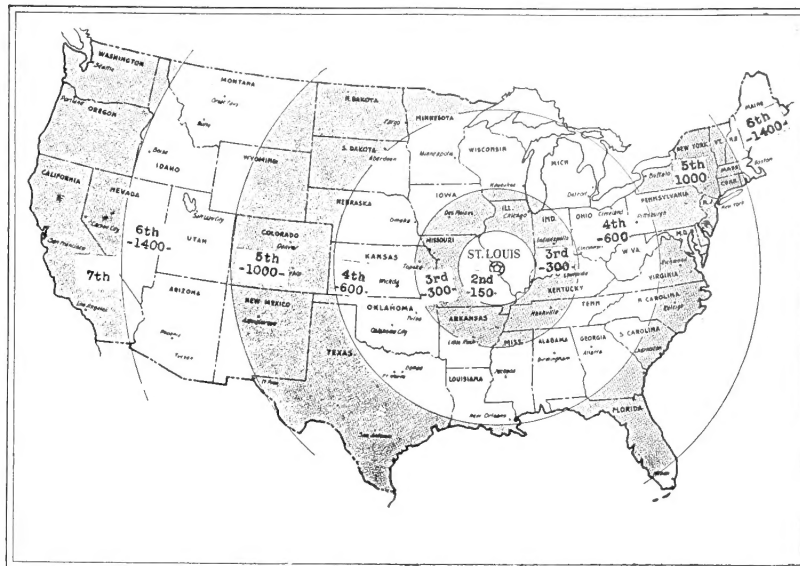

PRICES—Subject to Change Without Notice

Raw Materials

Owing to the uncertainty of being able to get exact raw materials for the manufacture of products, we reserve the right to use substitute materials, should we be compelled to do so. Such products shall, however, be practical and of equal value, or else be sold at a lower or higher price to conform to our high standard of value.

Taxes

All federal, state or local taxes imposed after this catalog is printed will be added to all prices.

How to Figure Transportation Charges.

An average order for tropical or goldfish weighs from 10 to 20 lbs. In order that you may determine express or parcel post rates from St. Louis we are listing below 5-lb. parcel post rates and 20-lb. express rates.

Approximate Express Rates on Live Fish

Per lb.	\$0.50
Three lbs. for	1.35

Medicated Aquarium and Pool Neutralizers

These medicated water neutralizers are necessary to counteract acid conditions in aquariums or pools. For aquariums, just use one at the time.

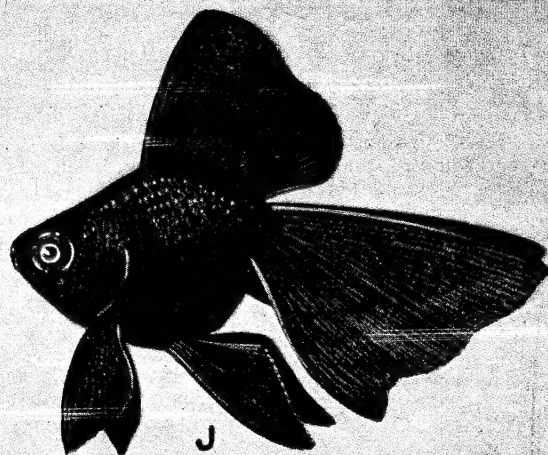

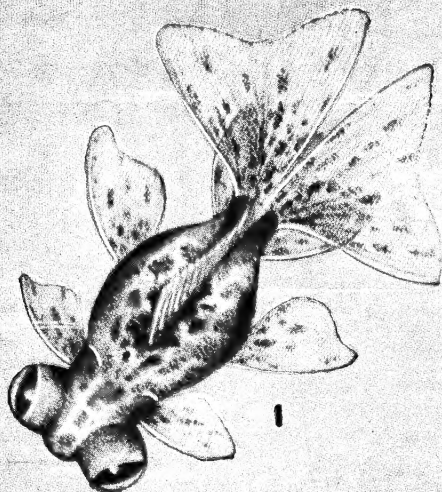

If water is acid they gradually disappear, depending on the amount of acidity in the water. For pools, they may be used one for each 100 gallons of water. They do not injure plants or fish; they only help to keep the water fresh and from becoming too acid.
